The Grade R Mathematics and Language Improvement Project is an initiative of the **Gauteng Department of Education** and its key partner, the **Gauteng Education Development Trust**.

The development and production of the training and classroom resources for the Grade R Mathematics and Language Improvement Project were made possible by generous project funding from the **United States Agency for International Development** and the **Zenex Foundation**.

The Grade R Mathematics and Language Improvement Project is managed by **JET Education Services** with **UCT's Schools Development Unit** and **Wordworks** as technical partners.

The **Schools Development Unit** (SDU) at the **University of Cape Town** (UCT) is the mathematics technical partner to the Grade R Mathematics and Language Improvement Project. The SDU is a unit within UCT's School of Education that focuses on teachers' professional development in Mathematics, Science, Literacy/Language and Life Skills from Grade R to Grade 12. The SDU offers teacher qualifications and approved UCT short courses, school-based work, materials development and research to support teaching and learning in all South African contexts.

This edition of the mathematics materials has benefitted from collegial engagement with Wordworks colleagues and has been improved by their alignment with the materials of the Language Improvement Programme. It has been enriched by the work of officials of the Gauteng Department of Education's Early Childhood Development and Foundation Phase Curriculum Sub-Directorates at District and Provincial level who have made valuable contributions to the content of the materials and engaged constructively to ensure alignment with provincial policies, practices and values.

Introduction

The Grade R Mathematics Improvement Programme (Grade R Maths) is based on a good knowledge of mathematics, an understanding of the progression in the Grade R curriculum, and a realisation that some teaching approaches are better suited to promote particular learning and outcomes.

The Grade R Maths *Activity Guide: Term 1* offers a structure for teaching maths in the first term of Grade R by:

- sequencing the content of each Mathematics Content Area across ten weeks
- providing progression and pacing within the five Content Areas
- focusing on one main Content Area per week (However, topics from other Content Areas may be introduced and practised during that week. Number-related learning and teaching takes place every day and is integrated into all the Content Areas.)
- suggesting activities for whole class, teacher-guided and independent group work.

Features of Activity Guide: Term 1

The following features form part of *Activity Guide: Term 1*:

- A content overview shows the new knowledge and practice focus per week.
- Term, week and Content Area Focus are clearly stated at the beginning of each week.
- Topics, New knowledge and Practise boxes show what will be covered in the week.
- New maths vocabulary to be taught is listed per week.

- A list is given of what you need to prepare for each week.
- Tip boxes give ideas and reminders.
- Integration boxes suggest how the maths can be reinforced in other subjects and daily activities during the Grade R daily programme.
- ‘Check that learners are able to’ boxes guide observation and continuous assessment.
- A continuous assessment page is based on the term’s activities.
- Resources and templates are included at the back of the guide.

Grade R Maths in the daily programme

Routine is important and learners enjoy the repetition and feel secure when they know what to do and what is expected of them.

Planning is also important to ensure that the routine runs smoothly. Read the contents for the week and prepare all the materials you will need for each day in advance. Set out the materials for the day beforehand so that everything is ready in the morning.

Grade R Maths suggests a sequence of activities that are repeated daily over a five-day week. Classroom organisation and activities that can be used to teach and reinforce maths concepts are suggested per week. These include:

Whole class activities per day

- Rhyme or song
- Oral counting
- Counting concrete objects
- Activities and questions linked to Content Area topics

At the end of the whole class activity, show the learners what they will be required to do at their workstations. All the materials they need should be set out so that they can begin working on the activities.

Transitions: moving between activities

Moving between the mat and the workstations is a great time to practise rhythmic counting and fun, creative ways to move, for example, slowly like tortoises, hopping like rabbits, quietly like mice, one by one with their name/picture symbol cards.

Small group activities

- There is one teacher-guided activity per day.
- There are four small group activities per day. These four independent activities (or side activities) should be set out at four **workstations** around the classroom – either at tables where the learners are seated or stand, or on the mat, or outside. The groups rotate to each **workstation** over the course of a week, depending on how the teacher has planned the activities. Remind learners to take turns, share materials and help each other while working.

Tidy-up time

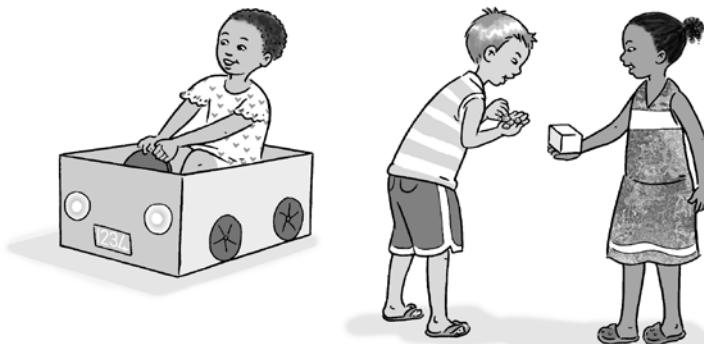

Learners need to know where materials belong. A shelf or table that is dedicated to maths equipment will help learners to be organised. Encourage learners to help each other during tidy-up time. Initially learners will need assistance and you will have to remind them where to put things, but they will soon get into the routine of putting things where they belong.

Choose group leaders and tidy-helpers each week. Give them specific tasks and responsibilities.

Free choice activities

Set out creative, interesting activities that learners can choose from once they have completed their workstation activity. These could include:

- blocks or other construction toys
- puzzles
- playdough
- books in the reading corner
- fantasy play, for example, shopping
- workbook or worksheet pages.

Assessment

Observation and continuous assessment during teacher-guided and whole class activities provides opportunities for insights into and a good overview of each learner's progress. This information is important for guiding further teaching and interventions for individual learners. The continuous assessment checklist on pages 190 and 192 of this guide is based on the content that has been taught in Term 1. This template can be used to record each learner's progress during the term.

Grade R Maths in the classroom

Set up an area in the classroom that is dedicated to maths and is near the mat. This is a shared space where learners can contribute to and engage with the topic they are learning about. An ideal maths area will include:

- small table against a wall
- number line made with string and pegs
- daily weather chart
- calendar for each month with blocks for each day
- chart with the names of the days of the week
- daily programme with pictures for the different activities
- learners' name cards and symbols arranged according to their group names
- helpers' symbols to move between learners' names according to each day of the week
- helpers' chart.

Make a ‘classroom rules’ poster with the learners. Display it where they can easily see it. There should be no more than six or seven rules.

Resources for Grade R Maths

Grade R Maths Resource Kit

Grade R Maths provides a kit for learning and teaching maths that provides apparatus for a small group of six to eight learners to use. The kit includes the following items:

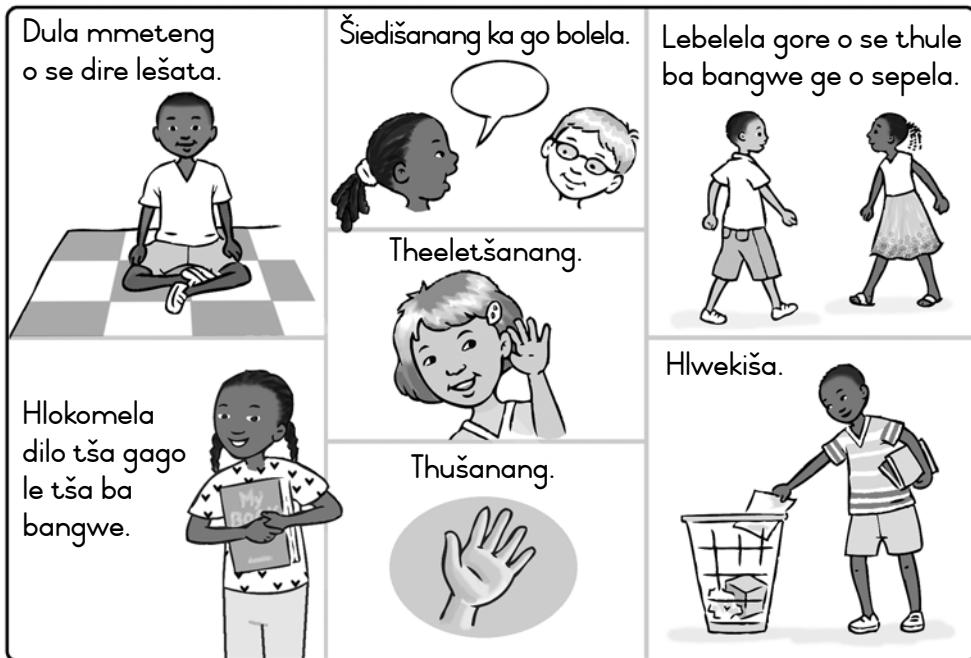

- counting materials, for example, coloured discs and sticks, fruit and animal counters, Unifix blocks
- jumbo dice
- strings of ten structure beads
- dot cards
- number cards: number symbols (0–10) and number words (zero–ten)
- attribute blocks.

These should not be the only resources that teachers and learners use during maths activities. Everyday objects from home are ideal for sorting, counting and exploring shapes.

Dira phoustara ya 'melao ya phapoši' le barutwana. E bee fao ba tla e bonago gabonolo. Go se be le melao ya go feta ye tshela goba šupa.

Recycled materials

Store recycled materials in labelled containers with lids (such as: fruit and vegetable packaging, 2-litre ice-cream containers and 500-ml feta tubs). Place the containers on a shelf or somewhere that the learners can reach. Encourage learners to put the objects away during tidy-up time if they have used them at their workstations or during free choice activities. Here are some ideas for maths resources:

- bottle caps and lids (different shapes, sizes and colours)
- different-sized boxes (toothpaste, matchbox, cereal, medicine, packaging)
- plastic containers (500-ml and 1-litre bottles, margarine tubs, 250-ml and 500-ml yoghurt tubs, ice-cream containers, vegetable packaging)
- tubes and cylinders (cardboard toilet roll inners, paper towel inners, foil roll inners, tins)
- egg boxes
- buttons, old keys, plastic spoons, ice-cream sticks, bread packet tags
- variety of balls, beanbags, hula hoops.

Other resources

Other useful classroom resources for Grade R Maths teaching include:

- crayons, paint, glue, scissors
- playdough or modelling clay
- books that can be used for maths discussions
- building blocks and construction toys (collect wood offcuts if necessary)
- a variety of jigsaw puzzles and games, for example, dominoes, snakes and ladders, Ludo, Lotto

The Grade R Maths Poster Book

There are eleven posters in the Grade R Maths Poster Book. The posters present familiar contexts that learners can relate to that capture some aspect of maths, for example, in the classroom, on the playground, and in the kitchen. The posters are intended to stimulate interest and discussion on maths topics, including: number, patterns, space and shape, sequencing of time and measurement. The posters can be used to engage learners in critical thinking and reasoning. They are perfect for developing problem-solving skills and for maths investigations.

Teachers can encourage learners to discuss the posters and share their thinking by asking questions to guide them in focusing on a particular aspect of the poster, for example:

- What do you see in the picture?
- Where do you think the children/people are?
- What is happening in the picture?
- Can you tell me a story about the picture?
- How many ... can you see? What if there was one more/fewer ...?
- Where is the ...?
- What would happen if ...?
- What do you think will happen next?
- What do you think ... can see from where they are standing?
- What pattern can you see? Describe the pattern.
- What shapes can you see?
- Which ... is the tallest/shortest?
- Can you use any maths words to describe something in the picture?

Getting ready

**TIP**

Use opportunities in the daily routine to introduce the new maths vocabulary. Remember to talk about the daily programme.

For the activities this week, you will need to prepare the following:

- fill a bag with enough different small objects so that you have one for each learner
- a number frieze for number 1:
 - make a house shape on an A3 page
 - copy and colour in the templates on page 204 – 1, *one, one dot, one elephant*
 - glue the labels and pictures into the house
- set up the maths area with a focus on ‘1’ – look for pictures of single objects
- make 15 number ‘1’ dot cards
- make 15 number ‘1’ symbol cards (template page 204)
- make 5 number ‘one’ word cards (template page 204)
- collect 10 egg boxes (Mark each egg cup with one, two or three dots. Make various combinations of dots on each egg box.)

Whole class activities

Day 1

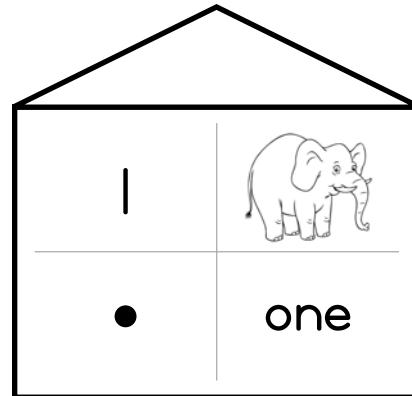

TIP
Remind learners of group names and class rules, and the tidy-up process.

What you need

- | | |
|---------------------------------------|--|
| • Song: <i>Hokey Pokey</i> (page 194) | • Enough different small objects so that you have one for each learner |
| • <i>Number 1 story</i> (page 196) | • Number frieze: Number 1 |
| • 15 number ‘1’ dot cards | |
| • 15 number ‘1’ symbol cards | |

1. **Song:** Introduce the song, *Hokey Pokey*, with actions.
2. **Oral counting 1–5:** Count and stamp your foot on each number. Repeat with learners joining in.
3. **Introducing number ‘1’:** Tell the *Number 1 story*. The animal’s house is the focus of the story. Show the parts of the number frieze as you build up the story of the animal and images of the house: the different representations of number 1, for example, the elephant picture, the dot, the symbol and the word. Display the parts of the frieze in the animal house on the wall in the maths area.
4. **Body parts:** Talk about body parts that we only have one of, for example, one nose, one mouth, one head, one tongue.
5. **Identifying one object:** Place enough different small objects in a bag for each learner to take one. Learners take turns to take out one object. They describe the objects and say how they would use it. Prompt the use of the word ‘one’, for example, ‘I have one hairbrush.’ Now place the objects on a table. Five learners place a number 1 dot card and number 1 symbol card next to five of the objects on the table. Repeat the process with two other groups of five learners.
6. **Small group activities:** Show the learners the four workstations. Demonstrate the activity at each workstation. Explain the tidy-up process.

Teacher-guided activity

What you need

- Handful of counters for each learner
- For each learner, a tub with:
 - Number '1' dot and symbol cards
 - Picture card representing one object
 - 3 animal counters
- 8 objects to match the picture cards
- 3 plastic yoghurt lids for each learner
- Extra animal counters
- Playdough

1. **Counting objects – one-to-one correspondence:** Place a pile of different-coloured counters in front of each learner. Learners touch and count them.
2. **Sorting:** Learners sort their animal counters according to colour. They count how many of each colour they each have.

3. **Counting objects 1–5:** Six learners stand at the front. Give one learner the five banana pictures. All the learners say the *Bananas* rhyme while the learner holding the banana pictures gives one to each of the other five learners standing in the front. Discuss:

- ★ How many bananas is each learner holding? (Count one for each learner.)

- ★ How many bananas are there all together? (Count these.)

Two learners stay standing. The others give their banana pictures to them and then sit down. Ask the class who has more bananas and who has less. Count the bananas that each learner has.

4. **Discovering properties of boxes:** Place five different-sized boxes on the mat. Count the boxes. Hold up a box and discuss.

Guiding questions:

- ★ What can you tell me about this box?
- ★ Can anyone show me where you can see a corner in our classroom? (Ask one learner to stand in a corner.)
- ★ Can anyone show me a corner on this box?
- ★ Let's count all the corners on the box.
- ★ Can you show me one side of the box?
- ★ Can you show me another side of the box?
- ★ How many sides are there altogether?
- ★ Where is the edge of the box?
- ★ Can we count all the edges?

5. **Discovering properties of balls:** Hold up a ball for the class to see.

Guiding questions:

- ★ What can you tell me about this ball?

Ask the learners to sit in a circle and pass the ball around. As it is passed from learner to learner, they describe the shape of the ball. Prompt the learners to tell you that it is round and that it has no corners or edges.

- ★ What can you tell me about the surface of the ball?
- ★ Does the ball have corners or edges?

6. **Sliding and rolling:** Learners roll a ball to each other. Describe how the ball moves: we 'roll' it. Show the learners a box.

Guiding questions:

- ★ How does the ball move?
- ★ Can we roll the box?
- ★ What would be the best way to move the box across the floor? (Prompt learners to say slide.)

7. **Small group activities:** Describe the activities at the four workstations. Remind learners about the tidy-up process.

When referring to other objects in the classroom, for example, desks, books or blocks, use maths vocabulary such as: round, sides, corners, edges, straight, flat.

 - ★ Which things slide? Why do you think they slide?
5. **Small group activities:** Remind the learners about the activities at the workstations and the tidy-up process.

 - ★ Jump into a hula hoop and jump out.
 - ★ Stand with one leg in the hula hoop and one leg out.
 - ★ Climb into the box and climb out.
 - ★ Throw a beanbag into a bucket and take it out.
 Learners say where they are, or where the beanbag is.

Draw shapes with chalk if you do not have hula hoops or large boxes. Make balls out of newspaper if you do not have beanbags.

Small group activities

Teacher-guided activity

What you need

- Selection of ball- and box-shaped everyday objects
- Big and small building blocks
- Small ramp
- 15 big and small objects

- Counting 1–5:** Learners hold up a hand and count from 1 to 5 on their fingers.
- 'Big' and 'small' game:** Put a selection of 15 big and small objects in the centre of the group. Discuss which are big and which are small. Explain the game to learners:
Call out a learner's name and then say 'big' or 'small'. As quickly as possible the learner takes a big or small object. Each learner has a turn. At the end of the game, learners replace the objects in the centre of the mat. Ask learners if they had a big or a small object, and what the object was.
- Sorting objects into 'big' and 'small', counting:** Give each learner five different-sized blocks that can be sorted into big and small. Learners count their blocks. Learners show their biggest and smallest block to the group. Learners order their blocks from smallest to biggest. Learners order the blocks from biggest to smallest.
- Properties of balls and boxes game:** Put a selection of ball- and box-shaped objects on the mat. Call out a learner's name and one property of a box or a ball, for example, it has corners, it is round, it has edges, it has sides, it rolls, it slides. Learners identify the object with that property. Learners keep the object once identified. Compare the similarities and differences between their objects.

Guiding questions:

Sort objects that slide and roll. Choose five objects.

- ★ Which objects do you think will roll? Why?
- ★ Which objects do you think will slide? Why?

Learners use the ramp to explore whether the objects roll or slide.

Learners make two piles of objects: those that slide and those that roll.

- ★ How many objects do we have that slide? How many that roll?
- ★ Which group has more? Which group has less?

Integration

Home Language and Life Skills (outdoor activities):

- Vocabulary development (opposites) and responding to instructions.
- Learners work in groups to explore which objects roll or slide down a ramp.
- To reinforce the concept of big and small, the learners roll up into a small ball shape and then stretch out to make themselves as big as they can.

Check that learners are able to:

- sort and compare balls and boxes
- identify the properties of balls and boxes
- identify objects that roll and that slide
- understand the positions 'in' and 'out' (Observe during the whole group activity on Day 5.)
- understand the concepts 'big' and 'small'

Whole class activities

Day 1

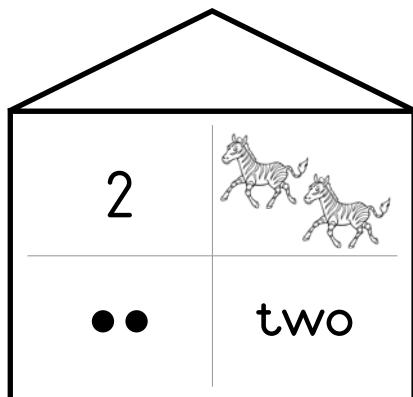

TIP
Remember to use the toilet routine to practise ordinal numbers (first, second, third) and position (in front of, behind, between, tallest, shortest).

What you need

- Rhyme: *One baby fish* (page 196)
- *Number 2 story* (page 196)
- Number frieze: Number 2
- Place 5 pairs of objects around the classroom
- 15 number '2' dot, word and symbol cards

1. **Rhyme:** Say the rhyme, *One baby fish*.
2. **Oral counting:** Learners count from 1 to 5 and tap their knees. Repeat while learners tap their shoulders.
3. **Introducing number '2':** Talk about the *Number 1 story*. Tell the *Number 2 story*. The animals' house is the focus of the story. Show the parts of the number frieze as you build up the story of the animals and images of the house: the different representations of number 2, for example, the picture, the dots, the symbol and the word. Display the parts of the frieze in the animal house on the wall in the maths area.

Guiding questions:

- ★ How many zebras live in this house?
 - ★ What else are there two of in the story?
 - ★ How many more zebras than elephants are there in the pictures?
 - ★ Can you think of two things you would like to add?
4. **Matching dots, pictures, number symbols and words for '2':** Ask learners to match a picture, a dot and a symbol to the Number 2 frieze. Show learners the number word and say the word 'two'. Ask a learner to match the number word to the frieze.
 5. **Finding 2 things:** Select learners to find two of the same objects in the classroom. Give other learners the number '2' cards to match to the objects. Place them on the maths table.
 6. **Small group activities:** Describe the activities at the four workstations. Remind learners about the tidy-up process.

Guiding questions:

- ★ What can you tell me about the shape of the windows?
 - ★ What can you tell me about the shape of the soccer ball?
 - ★ What other shapes can we see in our classroom?
 - ★ What shapes can you remember from your bedrooms at home?
5. **Going from 3-D to 2-D:** Ask one learner to stand. Demonstrate that depending on where you are looking from, you can see a different view of the learner – from the front, back, side and above (use a chair to stand on). Demonstrate that it is possible to turn the learner around, hold him/her and hug him/her.

Let the learner lie on his/her back on a large sheet of paper. Trace around him/her. Draw learners’ attention to the line as you draw: ‘around his/her head’, ‘along his/her side’. When the learner stands up, ask what learners can see on the paper (a picture of the learner’s body).

TIP
Put two labelled pictures of a circle on the wall above the maths table.

6. **Introducing the circle:** Learners sit in pairs. Place a box containing a collection of circle-shaped objects on the mat. One learner from each pair fetches an object. In pairs, they take turns to run a finger around the circular edges of the objects, for example, the rim of the cup, the edge of the plate.

Take one object, for example, a plate. Say, ‘What will happen if we draw around the edge of the plate?’

Put a piece of paper on the mat. Trace around the plate with a koki. Ask learners if they know what this shape is called. Tell them it is a circle. Ask about the shape. Ask the learners to watch the line as you draw. Talk about how the line curves as it goes around the object.

Ask a learner to choose another object and help them to draw around it. Talk about how the line curves. Ask learners if they can see any other circles in the classroom.

7. **Small group activities:** Remind the learners about the activities at the workstations and the tidy-up process.

 TIP

If you have mirrors available, let learners look at themselves in the mirrors to explore symmetry in their own bodies by identifying the matching body parts on the left and right sides.

Guiding questions:

Tell this Beetle story: ‘Beetle is worried that she doesn’t look like other beetles. Their bodies look exactly the same on each side. She also wants to have two dots on each side of her body.’

Guiding questions:

- ★ How do you think we can help this beetle solve her problem?

Put paint on each of the two spots and eye on the one side of the beetle picture. Fold the picture of the beetle in half along the midline, so that two dots and another eye are printed on the other half of the beetle. Discuss with learners whether they think the two sides of the beetle are the same.

6. **Small group activities:** Remind the learners about the activities at the workstations and the tidy-up process.

Integration

Home Language and Life Skills:

Workstation 1

What you need

- Playdough template: Number 2 per learner (page 212)
- Playdough

Learners use playdough to form the number '2', to roll two balls of playdough to place on the tree, and to roll two balls of playdough to place in the grid.

Workstation 2

What you need

- Paint in shallow trays
- Large sheets of paper for each learner
- Different-sized objects with circular surfaces (for example, yoghurt containers, tins, toilet roll inners, disposable cups, lids)

Learners print using circle-shaped objects. Press the object into the paint and then onto paper to create a circle print.

Workstation 3

What you need

- Pictures of food from advertising pamphlets, magazines and newspapers
- 1 large circle drawn on A4 paper per learner
- Scissors and glue

Learners cut out the circle to make a 'plate'. They cut out and glue pictures of food onto their plates.

Learners who struggle with cutting can tear pictures and can roll playdough into a 'sausage' shape to place on the 'plate' outline.

Workstation 4

What you need

- Puzzles with a 'body' theme

Learners each build a puzzle.

Whole class activities

Day 1

What you need

- 3-D objects such as blocks, boxes of different sizes, square containers for the maths table
- 1 large cardboard square
- 1 large box
- 1 large sheet of paper
- A koki

1. **Rhyme:** Say any of the counting rhymes from the previous weeks.
2. **Oral counting:** Learners pat their tummies and count from 1 to 5.
3. **Counting objects 1–5:** Place the boxes and blocks on the mat. Ask learners to fetch one block and one box.

Guiding questions:

- ★ How many objects do we have?
Ask them to fetch another block.
 - ★ How many objects do we have now?
Repeat until there are five objects. The learners count as they touch each object.
 - ★ Do we have more boxes or more blocks?
 - ★ Which do we have fewer of?
4. **Making squares:** Talk about one of the boxes in the classroom. Trace around a large square box to draw a square. Talk about how the line goes straight along, makes a sharp turn at a corner and then goes straight again, along all the edges.

Guiding questions:

- ★ Do you know what this shape is called?
- ★ How many straight lines does the square have?
- ★ How many corners does this square have?
- ★ Which other sides could I use on this box to make another square shape on the paper?
- ★ Will it be the same? Why?

Trace around the side learners identify, describing the lines as you do so.

5. **Properties of a square:** Show the cardboard square.

Guiding questions:

- ★ Does anyone know what this shape is called?
- ★ Is this shape the same as the one we have just drawn? Why?

TIP
As you trace around the box, focus on the lines being straight rather than curved (discussed when tracing around a circle in Week 4).

TIP
At the end of the day ask the learners to bring square-shaped objects from home for Day 2.

Pass the square attribute blocks around the class for learners to feel and explore the properties.

- ★ What do you feel around the edge of the objects?
- ★ What do the sides look like? And the corners?
- ★ What else can you see and feel on your square?
- ★ How is this different to the circle shapes we looked at last week?

6. **Small group activities:** Describe the activities at the four workstations. Remind learners about the tidy-up process.

3. **Counting objects 1–5:** Place square-shaped objects, for example, book, box, lid or block on the mat. Ask five learners each to fetch an object and stand in front. Count from 1 to 5 together. Learners describe their object and count the corners, the sides and the edges.

Guiding questions:

- ★ What makes these objects square?

 - ★ What is the same about the object _____ is holding and the one that _____ is holding?
 - ★ Can you think of anything else you could have brought from home that is square-shaped?
4. **Compare squares and circles:** Place the large cardboard squares and circles on the wall. Ask the learners what the shapes are called. Ask learners to ‘walk’ a circle, then a square. Ask learners to draw a square and a circle in the air. Discuss the differences and similarities between the square and the circle.

Guiding questions:

- ★ What is different about these two shapes?
 - ★ Which one has straight lines? (Count these.)
 - ★ Which one has a curved line?
 - ★ Which one has corners? (Count these.)
5. **Small group activities:** Remind the learners about the activities at the workstations and the tidy-up process.

TIP
Be prepared to provide extra square-shaped objects, for example, tiles, mosaics, lids, blocks, mirrors, Lego, Duplo and so on.

Show the 1 and 2 dot cards (from the *Resource Kit*) and place them on the mat. Show the elephant and zebra pictures. Learners match the elephant to the 1 dot card, and the zebras to the 2 dot card.

Guiding questions:

- ★ Can you match the zebras to another card?

Learners take out their dot cards and put them face down on the mat. They turn over any card and take turns to say what number their dot card represents. They match the correct number of animal counters to the card. Repeat with another dot card.

- ★ Which animal do you have one of?
- ★ Which animal do you have two of?
- ★ How many animals do you have altogether? (Count them.)

Learners match their picture cards to their dot cards. They match their number symbol and number word cards to their picture cards.

4. Reinforcing boxes and balls: Explain to the group how to use the feely bag. Without looking at it, a learner feels for an object inside the bag and describes what it feels like. The other learners says what they think it is. The learner takes the object out of the bag and learners look at it together, discussing all the properties. Encourage learners to use vocabulary such as: sides, smooth, round, sharp corners and straight sides.

5. Exploring the properties of a box – 3-D activity: Learners explore the inside and outside of a large cardboard box. They climb inside the box and then stand outside the box, walk around it tracing the edges with their hands, touch the corners and turn the box over. Count the sides of the box together.

6. Exploring the square – 2-D activity: On a large sheet of paper, trace around one of the faces of a big box.

Guiding questions:

- ★ What do you think this shape will look like?
- ★ How do you know it is a square?
- ★ Could we trace around another side of this box if we want to make another square?
- ★ How many lines does the square have? Tell me about them.

TIP

Draw a face on each side of the box to assist learners in counting the sides.

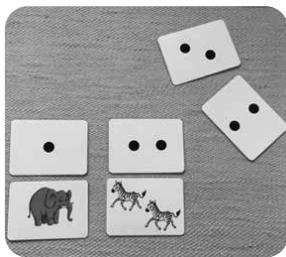

TIP

Observe the learners' progress across other Grade R Mathematics Content Areas that have been covered in previous weeks.

Check that learners are able to:

- recognise, name and describe a square
- identify properties of a box and a square shape
- follow instructions to move forwards and backwards
- follow instructions related to inside and outside
- match objects to dot, picture and number symbol cards

Workstation 1

What you need

- Playdough
- Playdough boards for each learner
- Rollers and dough cutters (square and circle)

Learners make playdough shapes using circle- and square-shaped dough cutters. They use these shapes to make models of their choice.

Workstation 2

TIP
Prepare squares for those learners who struggle with tracing.

What you need

- Coloured paper
- Scissors and glue
- Plain paper for each learner
- Cubes or blocks

Learners trace around cubes or blocks to draw a square. They cut out the squares of different sizes and colours. They paste them onto plain paper to make a picture.

Workstation 3 (This is a group activity.)

What you need

- For each learner: square- and circle-shaped everyday objects
- A large piece of paper with a circle drawn on it
- A large piece of paper with a square drawn on it

Learners sort the objects into two groups – square objects and circular objects. They place the objects on the piece of paper with the matching shape.

Workstation 4

TIP
Choose puzzles based on the learners' abilities.

What you need

- A six-piece puzzle for each learner (see page 220)

Learners build puzzles with a minimum of six puzzle pieces.

4. **Matching dot cards and number symbol cards 1–3:**

Learners keep their fruit counters and dot cards in order in front of them. Place a set of number symbol cards 1, 2 and 3 in front of them. Ask them if they can remember which animals from the number stories go with each number card. Point to each card and ask learners to say the numbers.

Learners discuss which number symbol and word cards match their dot cards. They match the number symbol cards from their tubs to their counters and dot cards.

Guiding questions:

- ★ How do you know if this is a pattern?
- ★ Which fruit do you see at the beginning of the pattern?
- ★ Which fruit do you see next?

6. **Copying a pattern:** Make another pattern using the fruit. Ask learners to copy the pattern with their counters.

7. **Making groups the same 1–3:** Put a piece of string down the middle of the mat. Ask one learner to stand on each side.

Guiding questions:

- ★ How many learners are on this side? And on the other side?
- ★ How are both sides the same?

Add another learner to one side. Discuss the difference between the two sides.

- ★ What do we need to do to make both sides the same?

Add two learners to one of the sides.

- ★ Tell me what to do to make both sides the same.

8. **Problem solving using objects:** Give each learner two small yoghurt containers and six sticks. Ask them to place the sticks in the containers so that both containers have the same number of sticks. Ask what ‘the same’ means. Give each learner a turn to count the objects in each container to check if they are the same.

Integration

Home Language and Life Skills: visual literacy (patterns in pictures); patterns in songs and rhythms.

Check that learners are able to:

- recognise, match and name number symbols, number words and dot cards 1–3
- match objects with dot cards 1–3
- identify patterns
- copy patterns

TIP

Use two pattern strips if the group is large so that they can all see. Once the pattern strip paint has dried, paste the drawings on the pages with the borders.

Workstation 1

What you need

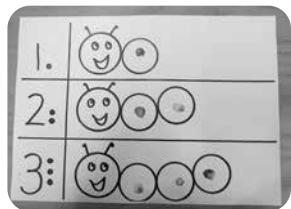

- Pattern strips
- Sponge, wood or cork stamps
- 1 piece of A4 paper per learner
- 1 piece of A5 paper per learner
- Paint in polystyrene trays
- Crayons

Learners use the stamps to copy a pattern to make a border on the A4 paper. Place a pattern strip in the middle of the table for them to copy. On the A5 paper, they draw a picture with any three objects they like.

Workstation 2

What you need

- Paint
- 1 worm counting page per learner
- 1 piece of A4 paper per learner
- A basin with water
- A towel

Learners dip their finger into the paint and make the correct number of fingerprints – 1, 2 or 3 – to form the body of each worm on their worm counting page.

When they have finished the worm, they use finger paint to make their own images representing three things.

Workstation 3

What you need

- Paper and crayons
- Pattern cards (representing counters and stick patterns)
- Counters and sticks from the *Resource Kit* – enough for each learner to copy the pattern cards

Learners choose a pattern card. They copy the pattern using the counters and sticks.

Workstation 4

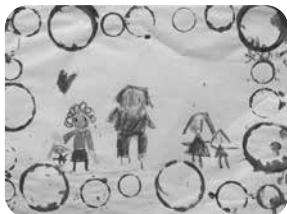

What you need

- Playdough
- Playdough template: Number 3 per learner (page 214)

Learners form the playdough and place it in the correct positions on the playdough template. They should use playdough to form the number '3', to roll three balls of playdough to place on the tree, and to roll three balls of playdough to place in the grid.

- ★ Are there more zebras or more meerkats?
- ★ If a zebra friend came to visit the two zebras, how many zebras would there be in their house?
- ★ If one meerkat moved in with the elephant, how many meerkats would be left in the meerkats' house?

4. **Counting objects 1–5:** Place the square, circle and triangle attribute blocks on the mat. Together count the squares and place these in a group. Do the same for the circles and triangles.

Guiding questions:

- ★ Which group has the most shapes?
- ★ Which group has the least shapes?
- ★ How can we make sure?

5. **Introducing triangles:** Point to the circle and square attribute blocks. Ask if learners remember the names of these shapes. Hold up a triangle.

Guiding questions:

- ★ Does anyone know what this shape is called?
- ★ Can anyone see a shape like this anywhere else in the classroom? Hold up the large cardboard triangle.
- ★ How many sides does this shape have? (Count these.)

Small group activities

Teacher-guided activity

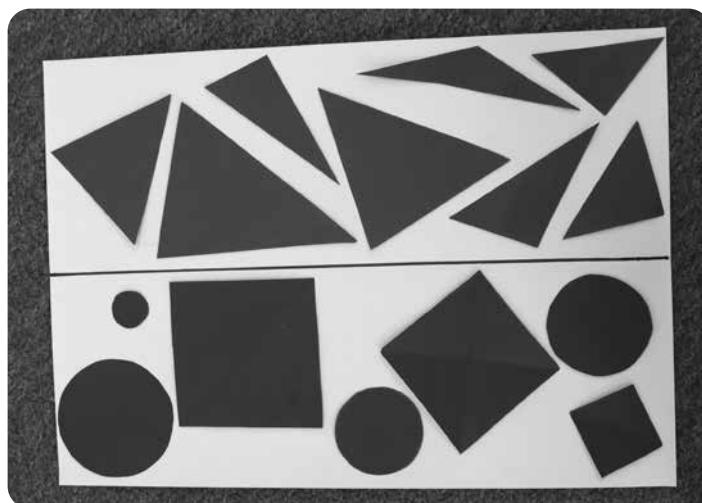

What you need

- | | |
|--|---|
| <ul style="list-style-type: none"> • 6 small toy cars • 3 cardboard boxes with openings cut out for cars to 'drive' into • Number 1–3 word, dot and symbol cards • A tub for each learner with number 1–3 symbol, word and | <ul style="list-style-type: none"> dot cards, and 6 fruit counters (from the <i>Resource Kit</i>) • A clear container with no more than 5 fruit counters • 2 large round plastic lids for each learner |
|--|---|

1. **Oral counting 1–10:** Learners clap as they count from 1 to 10. Learners tap the mat as they count backwards from 5 to 1.
 2. **Matching number symbols to cars:** Make garages by placing three cardboard boxes in a row with the openings facing the learners. Display a 1, 2 or 3 number symbol card on top of each box. Give three learners number 1–3 dot cards. They choose the correct number of cars to match their dot cards and park their cars in the correct garage.
- Guiding questions:**
- ★ Where are you going to park your car/s? Why?
 - ★ How many cars should you park in this garage?
 - ★ Which garage has more/fewer cars?
 - ★ Which garage has two cars in it?
3. **Matching numbers and fruit counters:** Give each learner a tub. They pack out the counters in order from 1 to 3. Then they match the number symbol, word and dot cards.

Guiding questions:

- ★ How many fruit counters do you have in each group?
- ★ Can you show me the group that has two fruits in it?
- ★ What number comes after 2? Show me the group with that number.

Focus on the group with three counters:

- ★ Give me one fruit. How many fruit do you have now?
 - ★ Does the group of fruit still match the number cards?
 - ★ How many fruit do I need to give you to make that number again?
4. **Estimating:** Place fruit counters (not more than five) in a clear container. Ask learners to estimate how many there are. Then count the items.

5. **Shake and break:** Show the learners the three fruit counters in your hands. Count them. Play 'Shake and break' with the fruit counters.

Guiding questions:

- ★ How many fruit counters do I have in this hand? And in this hand?
- ★ When I put them together how many do I have?

TIP

Estimating is trying to most accurately guess a number. Making wild guesses is not estimating.

Learners count three fruit counters from their tubs and place them on the mat in front of them. Give each learner two lids. Play the 'Shake and break' game together: Learners place their counters on their two lids as they have 'broken them up' and take turns to say how many they have on each lid.

- ★ How did you break up your counters?
- ★ How many do you have on each lid?
- ★ Whose are the same? Who did something different? Why are they the same/different?

Repeat, asking the learners to break up the counters in as many different ways as they can.

6. **Introducing zero:** If a learner has no counters on one lid and five on the other, discuss the empty lid. Talk about having nothing or zero on one lid and five on the other lid.
7. **Direction:** Play a game using arrow cards. Learners follow the up and down signals using their fingers, arms, legs and bodies.

Check that learners are able to:

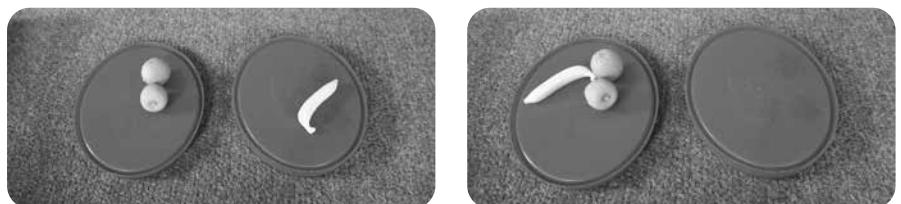

- estimate a number of objects
- use problem-solving techniques: counting all
- identify one more and one less in a collection of objects
- follow directions for up and down
- identify and order collections of 1, 2 and 3

Barutwana ba bala dibaledi tša dienywa tše tharo dikotlolong tša bona gomme ba di bea mmeteng mo pele ga bona. Efa morutwana yo mongwe le yo mongwe dikhurumelo tše pedi. Workstation 1

What you need

- 1 prepared page (as shown in photograph) per learner
- Playdough

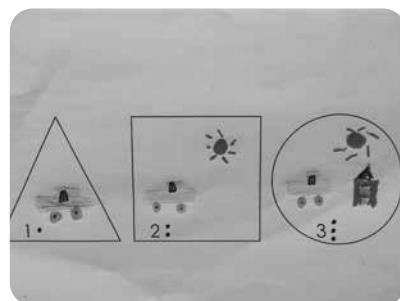

Learners make playdough objects of their choice and place them next to each number.

Workstation 2

What you need

- 1 prepared page (as shown in photograph) per learner
- Crayons

Learners draw any object or objects to match the numbers in the shapes on their pages.

Workstation 3

What you need

- 1 prepared page (as shown in photograph) per learner
- Cut-outs of 2 trees, 1 moon and 3 stars in a tub for each learner
- Glue and crayons

Learners create a picture by pasting 3 stars, 2 trees and 1 moon on their page. They decide what should be up in the sky and what should be down on the ground and draw other details of their choice.

Workstation 4

Provide puzzles that are developmentally appropriate.

What you need

- 1 puzzle (minimum six pieces) per learner

Learners build puzzles.

Integration

Home Language and Life Skills: While the learners play outdoors, use directional vocabulary, for example, up the ladder, down the slide. Play a jumping in and out game. Use a rope and pretend that the one side is the river and the other side is the riverbank. Learners jump into the river and then jump out before the 'crocodile' gets to them.

Whole class activities

Day 1

What you need

- Number friezes 1–3
- Number 1–3 dot, word, symbol and picture cards (*Resource Kit*)
- A rubbish bag filled with clean recycled objects
- Cards with learners' names and symbols

1. **Song/rhyme:** Practise a song or rhyme taught this term.
2. **Oral counting:** Count forwards from 1 to 10 and backwards from 5 to 1.
3. **Counting objects 1–5:** Place the recycled objects on the mat. Talk about what these objects are used for. Together count a group of five objects.
4. **Practising numbers 1–3:** Give learners dot, word, symbol and picture cards for numbers 1–3. Other learners count out groups of three recycled objects. Learners match the cards to the groups.
5. **Sorting and classifying:** Put all the recycled objects together in one pile.

Guiding questions:

- ★ How do you think we should sort these objects?

- ★ How will you sort this collection into groups to find the answer?
- ★ What will you do after you have sorted your animals into groups?

Guide learners towards starting by placing one of each of their different animals at the bottom of each column on their page. Interpret the data together comparing each learner's different groups. Ask each learner to explain how they know which animal they have more of.

Check that learners are able to:

- collect, sort and represent collections of objects
- count 1–5 objects

Workstation 1

What you need

- A collection of recycled objects • 5 boxes for each pair of learners

This activity should be done on the mat as the learners will need space. In pairs, learners sort the collection of recycled objects into the boxes.

Workstation 2

What you need

- Red, blue, green and yellow items for sorting
- Containers for colour sorting with a label indicating the colour

Learners sort the items into the correct colour containers.

Workstation 3

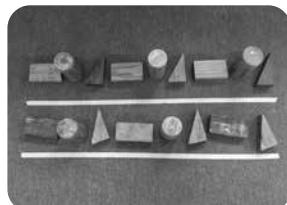

What you need

- Sorting trays or boxes
- Natural items for sorting: leaves, twigs, petals, pebbles, seed pods, shells, feathers

Learners sort the items into boxes or trays.

Workstation 4

What you need

- String or masking tape
- Blocks
- Prepare the block corner – create one pattern per pair of learners

Learners work in pairs to copy patterns in the block area. They move to a different pattern as they complete one. They can create their own patterns once all four patterns have been completed.

Integration

Home Language and Life Skills:

- Using symbols to represent something (emergent literacy).
- Interpreting symbols.
- Play games where the learners are sorted according to certain criteria, for example, those who had juice that morning, those who are going to play sport after school, those who walked to school.

Week 1

Story: Introducing the Grade R Maths family in conjunction with Poster 4

This is the Poster Book family. Granny and the children are in the lounge waiting for Mom to come home from work. Granny is sitting in the chair reading and listening out for Thami who is asleep in her bed. Dad isn't home yet, but you can see him and Thami in the family's picture on the wall. Can you see them?

Laylah and Malusi are hiding. They want to jump out and surprise their mother when she walks into the house.

'Sshh, Malusi, keep quiet, you'll spoil the surprise,' says Laylah.

Pepper the cat is listening to the children and pretending to be asleep and Dash is playing in the garden. Suddenly Dash begins to bark, run around and wag his tail wildly.

'Mom must be home,' whispers Malusi. 'Keep very quiet and very still.'

Mom opens the door and sees Granny but no one else.

'Hello,' she calls. Granny says hello, but keeps the secret of where the children are hiding.

Mom says, 'It's so quiet in here. Where are the children?'

'I don't know,' says Granny with a little smile and a twinkle in her eye.

'Surprise!' shout Malusi and Laylah as they hurry out of their hiding places. Pepper jumps out of her box in fright and Dash jumps up and down with excitement. Mom is very surprised and she laughs with the children.

'Whaaa!' cries Thami.

'Oh dear,' says everyone.

Story: Number 1 story (with Number 1 frieze template)

Some of the animals wanted to live together. 'Let's build houses next door to each other,' they said. 'That would be fun!'

And so the animals began to build their houses. The first house belonged to Elephant. He was big and lived all alone in his house. He painted a big number 1 on the roof of his house. His house had one door and one window. In Elephant's garden, there was one flower, one banana tree and one bench. Elephant loved to sit on the bench under the tree every day and smell the flower. He also loved to look up at the sky and look for things that could fly. What do you think he saw?

Week 4

Story: Number 2 story (with Number 2 frieze template)

Do you remember that some of the animals wanted to live together and have fun building their own houses next door to one another? Who remembers who the first house belonged to? That's right – Elephant!

A family called the Zebras built their house next to Elephant's house. The Zebras painted a big number 2 on the roof of their house because there were two of them.

Elephant was very happy when they built their house because he wasn't alone anymore.

The Zebras' house had two doors and two windows. In the garden they had two flowers, two apple trees and two benches.

After they had eaten grass under the trees, the Zebras liked to play with their two soccer balls and watch Elephant while he looked up at the sky and flapped his two big ears.

Week 6

Story: Number 3 story (with Number 3 frieze template)

Do you remember that some of the animals in Number Land wanted to live together and have fun building their own houses next door to one another?

Elephant's neighbours are the Zebras on one side. Elephant doesn't have any neighbours on the other side.

Questions:

- Why did the Zebras paint a big number 2 on the roof of their house?
- Who can remind me what the difference is between Elephant's house and the Zebras' house?
- Who do you think should build their house next to the Zebras' house? And how many animals do you think should live in that house?

A family of three grown-up brothers called the Meerkats were the next animals to build a house in Number Land. The Meerkats built their house next door to the Zebras.

This wasn't the first house that the Meerkats had built. When they left home because they had grown big enough, they built their own houses. But unfortunately, their first houses weren't strong enough. The first Meerkat built a house out of grass and the second Meerkat built a house out of sticks. Although the third Meerkat built a house out of bricks, he didn't know that he had to use cement between the bricks so when the jackal came, all three of their houses got blown down by the jackal's huffing and puffing.

The Meerkats decided to build a strong house next to the Zebras so that they could have neighbours close by to make them feel safe. They had also missed each other when they were living apart so they were very happy to have their three beds next to each other again. They were also happy to have three underground tunnels, three rocks and three bushes in their garden. Now they use these a lot as they love to play hide-and-seek. They also lie in the sun on the rocks when they feel cold.

Counting song: I have a little wheelbarrow

(to the tune of *Mary had a little lamb*)

I have a little wheelbarrow, wheelbarrow,
wheelbarrow
I have a little wheelbarrow, I fill it up with sand.
I fill it up with one spade, one spade, one spade
I fill it up with two spades, I fill it up with sand.
I fill it up with three spades, three spades,
three spades
I fill it up with four spades, I fill it up with sand.
Last I put in five spades, five spades, five spades
Last I put in five spades, and off I go again.

Week 7

Triangle song: This is a triangle

(to the tune of *Row, row, row your boat*)

This is a triangle,
Look and you will see.
With three corners and three sides.
Count them one, two, three!

Counting rhyme: Hear me count

I can count, want to see?
Here are my fingers – one, two, three.
Four and five, this hand is done,
Now I'll count the other one.
Six, seven, eight and nine,
Just one more, I'm doing fine.
The last little finger is number ten,
Now I'll count them all again.

Week 8

Day and night song: The sun is in the sky

(to the tune of *The farmer's in the den*)

The sun is in the sky, the sun is in the sky,
Hot and bright it gives us light,
The sun is in the sky.
The moon is in the sky, the moon is in the sky,
It's late and dark, we tuck up tight,
The moon is in the sky.

Day and night story: *Malik gets it wrong*

Malik was fast asleep in his bed. He was having such a happy dream, but suddenly he woke up and jumped out of bed.

'I'm going to be late for school,' worried Malik. 'I'd better hurry.'

So he brushed his teeth, put on his clothes and ran to the kitchen to find his breakfast.

But when he got to the kitchen, all was quiet. There was no breakfast and the family wasn't there either.

'What's going on?' wondered Malik. 'Where are Mom and Dad? Where is everyone else? And, where is my breakfast?'

Malik stopped. He looked around. Everything was dark. He reached for the wall to switch the light on.

Malik looked around. What was going on? He opened the curtains and looked outside. He saw a beautiful shiny moon and a sprinkle of stars.

'That's not right,' thought Malik. 'If it is school time, why is it still so dark outside?'

Malik listened to the sounds of the house. It was so quiet. But then he heard something that he knew well – Dad was snoring! He went to the bedroom and saw Dad fast asleep.

Mom woke up. 'What's going on, Malik? Why are you in your school clothes? It's still the middle of the night. Go on, back to bed you go. Sleep tight until morning,' she said and gave him a big hug.

Malik went back to bed. He didn't bother to put his pyjamas back on. Soon he fell fast asleep and when he woke up, it was morning.

Malik hurried to the kitchen and this time everything was normal. He could see the sun just coming up, his breakfast was on the table and his family were already eating.

Soon Dad called out, 'Hurry everyone, the school taxi will leave without us.'

The children hurried to the door with their father. Malik smiled. Everything was back to normal.
