Improvement Programme

# Xiletelo xa Migingiriko: Kotara ya 2

## Activity Guide: Term 2

The Grade R Mathematics and Language Improvement Project is an initiative of the **Gauteng Department of Education** and its key partner, the **Gauteng Education Development Trust**.

The development and production of the training and classroom resources for the Grade R Mathematics and Language Improvement Project were made possible by generous project funding from the **United States Agency for International Development** and the **Zenex Foundation**.

The Grade R Mathematics and Language Improvement Project is managed by **JET Education Services** with **UCT's Schools Development Unit** and **Wordworks** as technical partners.

The **Schools Development Unit** (SDU) at the **University of Cape Town** (UCT) is the mathematics technical partner to the Grade R Mathematics and Language Improvement Project. The SDU is a unit within UCT's School of Education that focuses on teachers' professional development in Mathematics, Science, Literacy/Language and Life Skills from Grade R to Grade 12. The SDU offers teacher qualifications and approved UCT short courses, school-based work, materials development and research to support teaching and learning in all South African contexts.

This edition of the mathematics materials has benefitted from collegial engagement with Wordworks colleagues and has been improved by their alignment with the materials of the Language Improvement Programme. It has been enriched by the work of officials of the Gauteng Department of Education's Early Childhood Development and Foundation Phase Curriculum Sub-Directorates at District and Provincial level who have made valuable contributions to the content of the materials and engaged constructively to ensure alignment with provincial policies, practices and values.

# Introduction

The Grade R Mathematics Improvement Programme (Grade R Maths) is based on a good knowledge of mathematics, an understanding of the progression in the Grade R curriculum, and a realisation that some teaching approaches are better suited to promote particular learning and outcomes.

The Grade R Maths *Activity Guide: Term 2* offers a structure for teaching maths in the second term of Grade R by:

- sequencing the content of each Mathematics Content Area across ten weeks
- providing progression and pacing within the five Content Areas
- focusing on one main Content Area per week (However, topics from other Content Areas may be introduced and practised during that week. Number-related learning and teaching takes place every day and is integrated into all the Content Areas.)
- suggesting activities for whole class, teacher-guided and independent group work.

## Features of Activity Guide: Term 2

The following features form part of *Activity Guide: Term 2*:

- A content overview shows the new knowledge and practice focus per week.
- Term, week and Content Area Focus are clearly stated at the beginning of each week.
- Topics, New knowledge and Practise boxes show what will be covered in the week.
- New maths vocabulary to be taught is listed per week.

<b>New maths vocabulary</b>

- A list is given of what you need to prepare for each week.
- Tip boxes give ideas and reminders.
- Integration boxes suggest how the maths can be reinforced in other subjects and daily activities during the Grade R daily programme.
- 'Check that learners are able to' boxes guide observation and continuous assessment.
- A continuous assessment page is based on the term's activities.
- Resources and templates are included at the back of the guide.

## Grade R Maths in the daily programme

Routine is important and learners enjoy the repetition and feel secure when they know what to do and what is expected of them.

Planning is also important to ensure that the routine runs smoothly. Read the contents for the week and prepare all the materials you will need for each day in advance. Set out the materials for the day beforehand so that everything is ready in the morning.

Grade R Maths suggests a sequence of activities that are repeated daily over a five-day week.

Classroom organisation and activities that can be used to teach and reinforce maths concepts are suggested per week. These include:

Lulamisa timatheriyali ta siku nkarhi wu nga si fika ku endlela leswaku xilo xin'wana na xin'wana xi va xi lunghekile nimixo.

*Grade R Maths* wu ringanyeta malongolokelo ya migingiriko leyi yi vuyeleriwaka siku na siku evhikini ra ntlhanu wa masiku. Malulamiso ya kamara ro dyondzela na migingiriko leyi yi nga tirhisiwaka ku dyondzisa na ku tiyisisa minongoti ya matematiki swi ringanyetiwa hi vhiki. Leswi swi katsa:

## Whole class activities per day

- Rhyme or song
- Oral counting
- Counting concrete objects
- Activities and questions linked to Content Area topics

At the end of the whole class activity, show the learners what they will be required to do at their workstations. All the materials they need should be set out so that they can begin working on the activities.

## Transitions: moving between activities

Moving between the mat and the workstations is a great time to practise rhythmic counting and fun, creative ways to move, for example, slowly like tortoises, hopping like rabbits, quietly like mice, one by one with their name/picture symbol cards.

## Small group activities

- There is one teacher-guided activity per day.
- There are four small group activities per day. These four independent activities (or side activities) should be set out at four **workstations** around the classroom – either at tables where the learners are seated or stand, or on the mat, or outside. The groups rotate to each **workstation** over the course of a week, depending on how the teacher has planned the activities. Remind learners to take turns, share materials and help each other while working.

## Tidy-up time

Learners need to know where materials belong. A shelf or table that is dedicated to maths equipment will help learners to be organised. Encourage learners to help each other during tidy-up time. Initially learners will need assistance and you will have to remind them where to put things, but they will soon get into the routine of putting things where they belong.

Choose group leaders and tidy-helpers each week. Give them specific tasks and responsibilities.

## Free choice activities

Set out creative, interesting activities that learners can choose from once they have completed their workstation activity. These could include:

- blocks or other construction toys
- puzzles
- playdough
- books in the reading corner
- fantasy play, for example, shopping
- workbook or worksheet pages.

## Migingiriko ya tllasi hinkwayo hi siku

- Rhayimi kumbe risimu
- Ku hlayela ka swanomu
- Ku hlayela michumu yo khomeka
- Migingiriko na swivutiso leswi fambelanaka na tinhlokomhaka ta Swiyenge swa Vundzeni

Emakumu ka nghingiriko wa tllasi hinkwayo, komba vadyondzi leswi va nga ta laveka ku swi endla eka switichi swo tirhela swa vona. Timatheriyali hinkwato leti va ti lavaka ti fanele ku lulamisiwa leswaku va kota ku sungula ku tirha migingiriko leyi.

## Micinco: ku rhurha exikarhi ka migingiriko

## Migingiriko ya ntlawa lowutsongo

- Ku na nghingiriko wun'we lowu leteriwaka hi mudyondzisi hi siku.
- Ku na mune wa migingiriko ya ntlawa lowutsongo hi siku. Mune wa migingiriko ya ku tirha va ri voxo (kumbe migingiriko ya le tlhelo) yi fanele ku lulamisiwa eka mune wa **switichi swo tirhela** hinkwako etlilasini – ku nga va ematafuleni laha vadyondzi va tshamaka kumbe va yimaka, kumbe ehenhla ka mete, kumbe ehandle. Mitlawa yi cincana hi vhiki eka **xitichi xo tirhela**, swi ri karhi swi lawuriwa hi hilaha mudyondzisi a kunguhateke migingiriko hakona. Tsundzuxa vadyondzi ku cincana, ku avelana timatheriyali na ku pfunana loko va ri eku tirheni.

## Nkarhi wo basisa

Vadyondzi va fanele ku tiva laha timatheriyali ti tshamaka kona. Xelufu kumbe tafula leri ri endleriweke switirhisiwa swa matematiki swi ta pfuna vadyondzi ku va va lulamerile. Khutaza vadyondzi ku pfunana hi nkarhi wo basisa. Ekusunguleni vadyondzi va lava mpfuneto kutani u ta boheka ku va tsundzuxa laha va faneleke ku veka kona swilo, kambe kungari khale va ta tolovela ku veka swilo laha swi tshamaka kona.

Hlawula varhangeri va ntlawa na vapfuni vo basisa vhiki rin'wana na rin'wana. Va nyiki swintirhwana swo kongoma na vutihlamuleri.

## Migingiriko yo hlawula va tshunxekile

Lulamisa migingiriko yo tsakisa, yo tumbuluxa leyi vadyondzi va nga hlawulaka kusuka eka yona xikan'wekan'we loko va hetile nghingiriko wa vona wa xitichi xo tirhela. Leyi yi nga katsa:

- tibuloko kumbe switlangiso swo aka swin'wana
- swiphazamisio
- vumba byo tlangisa
- tibuku leti nga eka ndhawu yo hlaya
- ntlangu wa milorho, tanihi xikombiso, ku xava
- tipheji ta buku ya ntirho kumbe maphepha yo tirhela.

## Assessment

Observation and continuous assessment during teacher-guided and whole class activities provides opportunities for insights into and a good overview of each learner's progress. This information is important for guiding further teaching and interventions for individual learners. The continuous assessment checklist on pages 190 and 192 of this guide is based on the content that has been taught in Term 2. This template can be used to record each learner's progress during the term.

## Grade R Maths in the classroom

Set up an area in the classroom that is dedicated to maths and is near the mat. This is a shared space where learners can contribute to and engage with the topic they are learning about. An ideal maths area will include:

- small table against a wall
- number line made with string and pegs
- daily weather chart
- calendar for each month with blocks for each day
- chart with the names of the days of the week
- daily programme with pictures for the different activities
- learners' name cards and symbols arranged according to their group names
- helpers' symbols to move between learners' names according to each day of the week
- helpers' chart.

## Makambelelo

Nxixaxiyo na makambelelo lama yaka emahlweni hi nkarhi wa migingiriko leyi leteriwaka hi mudyondzisi na ya tilasi hinkwayo swi nyika swivandlanene swa mitwisiso na nkatsakanyo wa kahle wa ku ya emahlweni ka mudyondzi un'wana na un'wana. Vuxokoxoko lebyi i bya nkoka eka ku letela ka ku dyondzisa ko yisa emahlweni na miphalalo ya vadyondzi hi un'weun'we. Nxaxamelo wa nkambisiso wa makambelelo lama yaka emahlweni lowu nga eka mapheji ya 191 na 193 ya xiletelo lexi wu simekiwile eka leswi nga endzeni leswi swi dyondzisiweke eka Kotara ya 2. Thempuleti leyi yi nga tirhisiwa ku rhekoda ku ya emahlweni ka mudyondzi un'wana na un'wana eka kotara.

## Grade R Maths ekamareni ro dyondzela

Lulamisa ndhawu ekamareni ro dyondzela leyi yi endleriweke matematiki naswona yi nga ekusuhi na mete. Lexi i xivandla lexi avelaniwaka laha vadyondzi vanga hoxaka xandla na ku vulavurisana hi nhlokomhaka leyi va nga eku dyondzeni hi mayelana na yona. Ndhawu ya matematiki ya kahle swinene yi ta katsa:

- xitafulana lexi nga khegetela khumbi
- layini ya tinomboro leyi endliweke hi ngoti na tiphekisi
- chati ya maxelo ya siku na siku
- khalendara ya n'hweti yin'wana na yin'wana leyi nga na tibuloko ta siku rin'wana na rin'wana
- chati leyi nga na mavito ya masiku ya vhiki
- nongonoko wa siku na siku lowu nga na swifaniso swa migingiriko yo hambanahambana
- makhadi ya mavito ya vadyondzi na mifungho leyi yi lulamisiweke hi ku ya hi mavito ya mitlawe ya vona
- mifungho ya vapfuni ku fambafamba exikarhi ka mavito ya vadyondzi hi ku ya hi siku rin'wana na rin'wana ra vhiki
- chati ya vapfuni.

Make a 'classroom rules' poster with the learners. Display it where they can easily see it. There should be no more than six or seven rules.

## Resources for Grade R Maths

### Grade R Maths Resource Kit

Grade R Maths provides a kit for learning and teaching maths that provides apparatus for a small group of six to eight learners to use. The kit includes the following items:

- counting materials, for example, coloured discs and sticks, fruit and animal counters, Unifix blocks
- jumbo dice
- strings of ten structure beads
- dot cards
- number cards: number symbols (0–10) and number words (zero–ten)
- attribute blocks.

These should not be the only resources that teachers and learners use during maths activities. Everyday objects from home are ideal for sorting, counting and exploring shapes.

Endlani phositara ya 'milawu ya kamara ro dyondzela' u ri na vadyondzi. Yi hayeke laha va nga ta kota ku yi vona hi ku olova. Ku fanele ku nga vi na kutlula tsevu kumbe nkombo wa milawu.

Leswi a swi fanelangi ku va swipfuno swi ri swoxe leswi vadyondzisi na vadyondzi va swi tirhisaka eka migingiriko ya matematiki. Michumu ya siku na siku kusuka ekaya yi kahle swinene eka ku ava, ku hlayela na ku valanga swivumbeko.

## Recycled materials

Store recycled materials in labelled containers with lids (such as: fruit and vegetable packaging, 2-litre ice-cream containers and 500-ml feta tubs). Place the containers on a shelf or somewhere that the learners can reach. Encourage learners to put the objects away during tidy-up time if they have used them at their workstations or during free choice activities. Here are some ideas for maths resources:

- bottle caps and lids (different shapes, sizes and colours)
- different-sized boxes (toothpaste, matchbox, cereal, medicine, packaging)
- plastic containers (500-ml and 1-litre bottles, margarine tubs, 250-ml and 500-ml yoghurt tubs, ice-cream containers, vegetable packaging)
- tubes and cylinders (cardboard toilet roll inners, paper towel inners, foil roll inners, tins)
- egg boxes
- buttons, old keys, plastic spoons, ice-cream sticks, bread packet tags
- variety of balls, beanbags, hula hoops.

## Other resources

Other useful classroom resources for Grade R Maths teaching include:

- crayons, paint, glue, scissors
- playdough or modelling clay
- books that can be used for maths discussions
- building blocks and construction toys (collect wood offcuts if necessary)
- a variety of jigsaw puzzles and games, for example, dominoes, snakes and ladders, Ludo, Lotto

## Timatheriyali leti vuyelerisiweke

Hlayisa timatheriyali leti vuyeleriweke eka tikhontheni leti leburaweke leti nga na swipfalo (to tanihi: mpako wa mihandzu na matsavu, tikhontheni ta 2-litara ta ayisikhirimi na timfuku ta 500-ml ta chizi ya feta). Veka tikhontheni leti exelufini kumbe kun'wana laha vadyondzi va nga ta kota ku fikela. Khutaza vadyondzi ku veka michumu ekule hi nkarhi wo basisa loko va yi tirhisile eka switichi swo tirhela swa vona kumbe hi nkarhi wa migingiriko yo hlawula va tshunxekile. Hi leyi mianakanyo yin'wana ya swipfuno swa matematiki:

- tipaniki na swipfalo swa mabodhlela (swivumbeko, tisayizi na mihlovo yo hambanahambana)
- mabokisi ya tisayizi to hambanahambana (xisibi xa meno, bokisi ra mecisi, rivelendzoho, murhi, mpako)
- tikhontheni ta pulasitiki (mabodhlela ya 500-ml ya litara yi1, timfuku ta majarini, timfuku ta yogati ta 250-ml na ta 500-ml, tikhontheni ta ayisikhirimi, mpako wa matsavu)
- mathumbu na tisilindara (switsondzelelo swa phepha ra xihambukelo swa khadibokisi, switsondzelelo swa thawula ra phepha, switsondzelelo swa foyili, swikotela)
- mabokisi ya matandza
- tikunupu, makhiya ya khale, malepula ya pulasitiki, swimhandzana swa ayisikhirimi, tithege ta maphakiti ya xinkwa
- tibolo to hambanahambana, tibinibege, tihulahupu.

## Swipfuno swin'wana

Swipfuno swa kamara ro dyondzela swo tirhiseka swin'wana swa madyondziselo ya *Grade R Maths* swi katsa:

- tikhirayoni, pende, xinamarheti, xikero
- vumba byo tlangisa kumbe vumba byo fanisa
- tibuku leti nga tirhisiwaka eka mikanelo ya matematiki
- tibuloko to aka na switlangiso swo aka (hlingeleta swipetlu swa mapulangi loko swi fanerile)

## The Grade R Maths Poster Book

There are eleven posters in the Grade R Maths *Poster Book*. The posters present familiar contexts that learners can relate to that capture some aspect of maths, for example, in the classroom, on the playground, and in the kitchen. The posters are intended to stimulate interest and discussion on maths topics, including: number, patterns, space and shape, sequencing of time and measurement. The posters can be used to engage learners in critical thinking and reasoning. They are perfect for developing problem-solving skills and for maths investigations.

Teachers can encourage learners to discuss the posters and share their thinking by asking questions to guide them in focusing on a particular aspect of the poster, for example:

- What do you see in the picture?
- Where do you think the children/people are?
- What is happening in the picture?
- Can you tell me a story about the picture?
- How many ... can you see? What if there was one more/fewer ...?
- Where is the ...?
- What would happen if ...?
- What do you think will happen next?
- What do you think ... can see from where they are standing?
- What pattern can you see? Describe the pattern.
- What shapes can you see?
- Which ... is the tallest/shortest?
- Can you use any maths words to describe something in the picture?

- chati ya vulehelahenhla
- makhadi yo tlanga ya jumbo
- maliencyeto: swingwece na timali ta phepha (ku yi tirhisa eka vhengele ro tlanga)
- wachi ya le khumbini ya analogo leyikulu
- xikalo xa ndzinganiso
- vuhlalu byo hlayela, ku ava, ku hulela na ku endla tipatironi
- misava na switirhisiwa swa ku tlanga swa mati
- switirhisiwa swa ku khandziya, ku ringanisa, ku jombha na ku thamuka.

**TIP**

Remember to talk about the daily programme. Remember to do the calendar, days of the week, months of the year and birthday chart each day.

3. **Counting objects 1–5:** Learners look at the birthday chart. Together count the first five months of the year. Discuss the fact that learners have just returned from a holiday and draw their attention to the current month of the year.

**Guiding questions:**

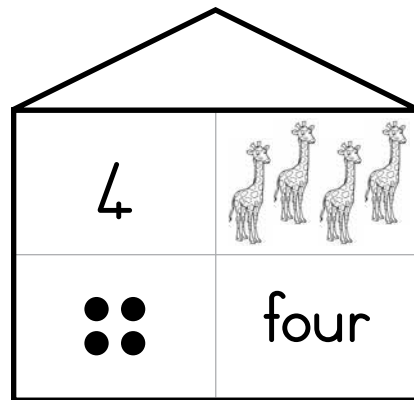

- ★ Which month are we in?
- ★ Which is the first month?
- ★ Are there any months that have five learners' names in it? (If there are, count these together.)

4. **Introducing number '4':** Point to number friezes 1 to 3.

**Guiding questions:**

- ★ How many animals do you think will live in the next house?
- ★ Will there be more or fewer than 3?

Tell the *Number 4 story*. The animals' house is the focus of the story. Show the parts of the number frieze as you build up the story of the animals and images of the house: the different representations of number 4, for example, the picture, the dots, the symbol and the word. Display the parts of the frieze in the animal house on the wall in the maths area. Count the giraffes together.

**Guiding questions:**

- ★ Who has seen a giraffe before? Where?
  - ★ How do you think they move?
  - ★ How does an elephant/a zebra/a meerkat move?
  - ★ How many more giraffes are there than meerkats?
  - ★ How many fewer meerkats are there than giraffes?
  - ★ If one giraffe went to the meerkats' house, how many animals would be in the meerkats' house?
5. **Small group activities:** Describe the activities at each workstation.

**Day 2**

**What you need**

- ✦ Xana i muhandzu wihi u wu tsakelaka eka saladi ya wena ya mihandzu?
- ✦ Xana i mixaka yo hambanahambana yingani hi nga yimbelela hi yona?

**TIP**

Make daily oral counting fun. Include ideas from learners when possible.

2. **Oral counting:** 1–10 and 5–1.
3. **Counting objects 1–5:** Learners sit in a circle. Place four groups of fruit counters on the mat: five bananas, three oranges, two apples and four strawberries.

**Guiding questions:**

- ★ How many bananas/oranges/apples/strawberries do you think there are?
- ★ Which pile has the most/fewest fruit?

Count each pile of fruit together.

4. **More than/fewer than; equal to:** Focus on the oranges and apples.

**Guiding questions:**

- ★ What do we need to do so that the number of oranges/apples is equal to the number of strawberries?
- ★ How can we make the group of oranges/apples have four?

5. **Maths table:** Learners go outside in groups of four. Each learner in a group should collect a similar small object, for example, twigs or leaves. Learners return to sit on the mat in their groups. Each group says what, and how many, they have found. Discuss the similarities and differences between collections. Give each group a number 4 dot, symbol or word card. One at a time, each group puts their objects and number 4 card on the table.

6. **Small group activities:** Describe the activities at each workstation.

**TIP**

The objects that the learners collect must be small enough to fit on the table.

**Integration**

**Home Language and Life Skills:** New maths vocabulary can be used throughout the day, for example, during snack time discussions.

**Day 3**

## Whole class activities

### Day 1

#### What you need

- Cardboard cut-outs (medium sized): 4 triangles, 3 circles, 7 squares
- 16 triangle, circle, square attribute blocks (*Resource Kit*)
- Song: *Making fruit salad* (page 194)
- Number 4 labels from maths table (from Week 1)

1. **Song:** Sing *Making fruit salad*.
2. **Oral counting:** 1–15 and 5–1.
3. **Counting objects 1–7:** Learners sit in a circle. Together look at groups of four triangle, three circle and seven square cardboard cut-outs.

#### Guiding questions:

- ★ How many triangles/circles/squares do you think there are in this group?
- ★ Which group has more/fewer than the group with the triangles/circles/squares?

Count the triangles and circles together 1–7. Then count the squares.

4. **Practising position – next to, between, in front of, behind, on top of:** Learners fetch one shape each from the mat. Play 'Sizwe says'. Give different instructions for each shape as you guide learners.

#### Guiding instructions:

- ★ All those with circles put their shape *in front of* their knee, face, tummy. (Repeat with squares and triangles.)
- ★ Hold your circle *behind* your back, knee, and so on with one hand/both hands.
- ★ Try to fit your triangle *behind* your ear.
- ★ Walk with your shape balancing *on top of* your head.
- ★ Those with a triangle hold it *between* your knees.
- ★ Those with a circle put it *next to* your body. Now put it on the other side of your body. (Repeat with squares and triangles.)

5. **Position:** Introduce 'underneath'.

#### Guiding questions:

- ★ Can you sit/lie with your shape *underneath* you, *underneath* your hand on the floor, *underneath* your foot?
- ★ What other part of your body can you place your shape *underneath*?

6. **Small group activities:** Describe the activities at each workstation.

### TIP

Cardboard is three-dimensional. It has length, breadth (width) and height. In Grade R we use cut-outs to show two-dimensional shapes, such as circles, squares, triangles and rectangles. Focus on the shape: the length, how wide the 'shape' is, the lines, the corners or points.

### TIP

Learners place shapes on the maths table in groups of four next to number 4 cards, as they go to their workstations.

## Whole class activities

### Day 1

#### What you need

- An A4 picture of a circle and a square for the maths table
- Circle-shaped objects (for example, cups, wastepaper bin, yoghurt containers, lids) hidden in the classroom
- Square- and rectangle-shaped objects (for example, boxes, dice, blocks, lunch boxes) hidden in the classroom

1. **Rhyme:** Learners choose a song or rhyme from previous weeks to sing or say.
2. **Oral counting:** 1–20 and 7–1.
3. **Counting objects 1–7:** Learners go on a hunt to find objects in the classroom that look like circles, squares or rectangles. (Make sure that you have enough objects so that there is one per learner.) Learners place the objects in the middle of the mat and sit in a circle. Together sort the objects into two groups: one with objects that are circular and another with objects that have corners, flat sides and straight edges (square and rectangular objects). Discuss why the objects have been sorted into these groups. Focus on the properties of the objects and discuss the shape.

#### Guiding questions:

- ★ Does this group of objects look as though it has more or fewer than seven objects?

Together count out seven objects that have a circular shape and point out that there are more than seven circle-shaped objects altogether in that group. Repeat this with the other group of square- and rectangle-shaped objects. Put the seven items from each group on the maths table next to the circle and square/rectangle pictures.

4. **Sorting; more than, fewer than, equal to:** Look at the objects that are left.

#### Guiding questions:

- ★ Do you think there are more objects that look like circles, or more objects that have straight edges and corners?
- ★ What do we need to do to find out?

Together sort the objects into two groups and talk about them.

- ★ Do you think these two groups have an equal number of objects in them?
- ★ Which of these two groups do you think has more/fewer objects?
- ★ Which is the smallest/biggest object in this group?
- ★ What different colours can you see in this group?
- ★ What are the objects in this group made of?
- ★ How else can we sort these objects?

#### TIP

Properties of 3-D objects include length, width, height. Talk about sides, edges and corners.

#### TIP

To help learners as they sort, provide two big containers, one labelled with a picture of a square and a rectangle, and another labelled with a picture of a circle.

- ★ How can we use one toilet roll tube to measure the height of your chair?

Learners explore this.

- ★ Where could we start measuring?

Discuss and guide them in marking where they start and end. Together count how many toilet roll tubes were needed to measure the height of the chair.

- ★ How many toilet roll tubes do you think we will need to measure the length of the seat of the chair?
- ★ Do you think we will need more or fewer toilet roll tubes to measure the seat?
- ★ What else could we use to measure different parts of your chairs?

Learners find something in the classroom that they would like to use to measure with. They explore measuring different parts of the chair using the objects they found, paper and string lengths.

Together count the cups and saucers, discuss learners' estimations and match the cups to the saucers.

### TIP

Make sure all learners are able to see the cups and saucers.

4. **Practising numbers 1–5:** Show learners the dot cards quickly without holding them up for a long time. Learners say how many dots are on each card. Show a dot card with an instruction linked to the number of dots on the card, for example: 'Find two friends wearing shoes.' 'Clap your hands three times.' Learners take turns to think of action instructions linked to the number of dots.
5. **Ordering numbers 1–5; more than, fewer than, equal to:** Place the dot cards face down. Learners take turns to pick up two cards. If the cards match, they keep them and if not they put the cards back. When learners find a matching pair they put them in the appropriate box.

## Songs, rhymes and stories

### Week 1

#### Counting song: *Making fruit salad*

(To the tune of *Here we go round the mulberry bush*)

This is the way we make salad, make salad, make salad,

This the way we make salad,

Let us get the fruit.

We fetch one banana, one banana, one banana,

We fetch one banana,

Let's get more fruit.

We fetch two apples, two apples, two apples,

We fetch two apples,

Let's get more fruit.

(Repeat with *three oranges, four grapes.*)

We fetch five berries, five berries, five berries,

We fetch five berries,

And add some juice.

#### Story: *Number 4 story (with Number 4 frieze template)*

Next came the Giraffes. There were four of them. They looked at the other three houses and wondered how they would manage to fit into a house with their long necks. They decided that because there were four of them, they would need four high windows so that they could open them wide and stretch their long necks out.

The number symbol 4 and number word four, went on the front of the house where everyone could see them. And the four doorbells went on the door.

When the Giraffes went outside, they had to bend down very low to fit through the door, just as they did when they drank water from the nearby stream. When they stood up straight, they were tall enough to look into their house through the high windows, and could almost see over the top of their house. They loved living next to the Meerkats and chatted to them every day.

## Shape story: *They pulled and they pulled*

One day a farmer went to his fields to pull up some vegetables for supper. He went to the potatoes and began to pull one out of the ground. The farmer pulled and pulled, but he couldn't pull up the potato. He called his wife to help. The farmer pulled and his wife pulled and finally the potato came out of the ground. 'What is going on?' asked the farmer. 'This potato is square!'

Next, the farmer and his wife went to get some carrots. They pulled and they pulled and they pulled and finally two carrots came out of the ground. 'What is going on?' asked the farmer's wife. 'These carrots are circle-shaped!'

The farmer and his wife wanted onions with their supper so they went to the onion patch. The farmer pulled and his wife pulled. They both pulled and pulled, but the onions wouldn't come out. They called their four children to help. Then the family pulled and pulled and finally three onions came out of the ground. 'What is going on?' they asked. 'These onions are triangle-shaped!'

They decided to make vegetable soup, so they needed four more onions. They needed more help and called one neighbour. It took them a long time to pull four more onions out of the ground. And even though they were smaller, they were also triangle-shaped!

The farmer and his wife took their potato, carrots and onions to the kitchen and made soup for supper. They invited their neighbour. 'Delicious!' all seven of them said at the same time.

(Repeat for four, three, two.)  
There was one in the bed  
and the little one said,  
'Good night. Sleep tight.'

### Story: *Number 5 story (with Number 5 frieze template)*

The five Monkeys love to swing between the five branches of the tree in their garden. They also have five poles in between the tree and their house. To get inside they often swing from these onto the roof of their house and in through the windows. They do this instead of going through the door. Next to the door is a big flowerpot with five flowers. When the Monkeys get tired and need a rest, they often swing down from the roof through one of the five windows instead of going into the house through one of the five doors. Otherwise they rest on their five hammocks outside. There are five so each one has their own.

All the animals stood in the road together to look at their marvellous houses: Elephant was in number 1, the Zebras were in number 2, the Meerkats were in number 3, the Giraffes were in number 4 and the Monkeys were in number 5. They had a party to celebrate their friendship and their smart houses.
