Activity Guide: Term 4

IsiNdebele | English

The Grade R Mathematics and Language Improvement Project is an initiative of the **Gauteng Department of Education** and its key partner, the **Gauteng Education Development Trust**.

The development and production of the training and classroom resources for the Grade R Mathematics and Language Improvement Project were made possible by generous project funding from the **United States Agency for International Development** and the **Zenex Foundation**.

The Grade R Mathematics and Language Improvement Project is managed by **JET Education Services** with **UCT's Schools Development Unit** and **Wordworks** as technical partners.

The **Schools Development Unit** (SDU) at the **University of Cape Town** (UCT) is the mathematics technical partner to the Grade R Mathematics and Language Improvement Project. The SDU is a unit within UCT's School of Education that focuses on teachers' professional development in Mathematics, Science, Literacy/Language and Life Skills from Grade R to Grade 12. The SDU offers teacher qualifications and approved UCT short courses, school-based work, materials development and research to support teaching and learning in all South African contexts.

This edition of the mathematics materials has benefitted from collegial engagement with Wordworks colleagues and has been improved by their alignment with the materials of the Language Improvement Programme. It has been enriched by the work of officials of the Gauteng Department of Education's Early Childhood Development and Foundation Phase Curriculum Sub-Directorates at District and Provincial level who have made valuable contributions to the content of the materials and engaged constructively to ensure alignment with provincial policies, practices and values.

Introduction

The Grade R Mathematics Improvement Programme (Grade R Maths) is based on a good knowledge of mathematics, an understanding of the progression in the Grade R curriculum, and a realisation that some teaching approaches are better suited to promote particular learning and outcomes.

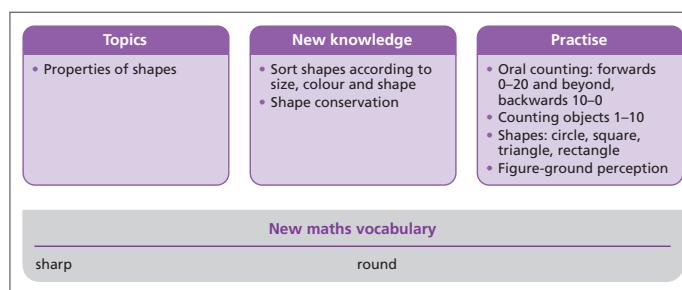

The Grade R Maths *Activity Guide: Term 4* offers a structure for teaching maths in the fourth term of Grade R by:

- sequencing the content of each Mathematics Content Area across ten weeks
- providing progression and pacing within the five Content Areas
- focusing on one main Content Area per week (However, topics from other Content Areas may be introduced and practised during that week. Number-related learning and teaching takes place every day and is integrated into all the Content Areas.)
- suggesting activities for whole class, teacher-guided and independent group work.

Features of Activity Guide: Term 4

The following features form part of *Activity Guide: Term 4*:

- A content overview shows the new knowledge and practice focus per week.
- Term, week and Content Area Focus are clearly stated at the beginning of each week.
- Topics, New knowledge and Practise boxes show what will be covered in the week.
- New maths vocabulary to be taught is listed per week.

- A list is given of what you need to prepare for each week.
- Tip boxes give ideas and reminders.
- Integration boxes suggest how the maths can be reinforced in other subjects and daily activities during the Grade R daily programme.
- 'Check that learners are able to' boxes guide observation and continuous assessment.
- A continuous assessment page is based on the term's activities.
- Resources and templates are included at the back of the guide.

Grade R Maths in the daily programme

Routine is important and learners enjoy the repetition and feel secure when they know what to do and what is expected of them.

Planning is also important to ensure that the routine runs smoothly. Read the contents for the week and prepare all the materials you will need for each day in advance. Set out the materials for the day beforehand so that everything is ready in the morning.

Grade R Maths suggests a sequence of activities that are repeated daily over a five-day week. Classroom organisation and activities that can be used to teach and reinforce maths concepts are suggested per week. These include:

Isingeniso

IHlelo lokuThuthukisa iimBalo zeGreyidi R (*i-Grade R Maths*) lisekelwe phezu kwelwazi elihle leembalo, ukuzwisa iragelo phambili lekharikhylamu yeGreyidi R, nokulemuka bonyana ezinye iindlela zokufundisa zikhambisana ngcono nokuhutjhulwa kokufunda nemiphumela ethileko.

UmHlahlandlela wemiSebenzi ye-Grade R Maths: Ithemu 4 inikela isakhiwo sokufundisa iimBalo kuthemu yesine ye-Greyidi R ngoku:

- landelanisa okumumethweko kwesiGaba sokuMumethweko seemBalo ngasinye eemvekeni ezilitjhumi
- nikela iragelophambili nebolo lokusebenza phakathi kweenGaba zokuMumethweko ezhlanu
- nqophana nesiGaba sokuMumethweko esisodwa esiqakathetileko ngeveke (Nanyana kunjalo, iinhloko ezivela kezinye iinGaba zokuMumethweko zingathulwa bezenziwe phakathi kweveke leyo. Ukufunda nokufundisa okukhambelana neenomboro kwenzeka ngamalanga begodu kuLanganiswe nazo zoke iinGaba zokuMumethweko.)
- veza imibono ngemisebenzi yetlasi yoke, ehlahlwa ngutitjhhere nomsebenzi wesiqhema ozijameleko.

I-Grade R Maths inesiphakamiso semisebenzi elandelanako ebuyeletwa ngamalanga evekeni yamalanga amahlanu. Ukuhleleka kwetlasi nemisebenzi engasetjenziselwa ukufundisa nokugandelela imiqondo yeembalo iyaphakanyiswa ngeveke. Lokhu kufaka hlangana:

Whole class activities per day

- Rhyme or song
- Oral counting
- Counting concrete objects
- Activities and questions linked to Content Area topics

At the end of the whole class activity, show the learners what they will be required to do at their workstations. All the materials they need should be set out so that they can begin working on the activities.

Transitions: moving between activities

Moving between the mat and the workstations is a great time to practise rhythmic counting and fun, creative ways to move, for example, slowly like tortoises, hopping like rabbits, quietly like mice, one by one with their name/picture symbol cards.

Small group activities

- There is one teacher-guided activity per day.
- There are four small group activities per day. These four independent activities (or side activities) should be set out at four **workstations** around the classroom – either at tables where the learners are seated or stand, or on the mat, or outside. The groups rotate to each **workstation** over the course of a week, depending on how the teacher has planned the activities. Remind learners to take turns, share materials and help each other while working.

Tidy-up time

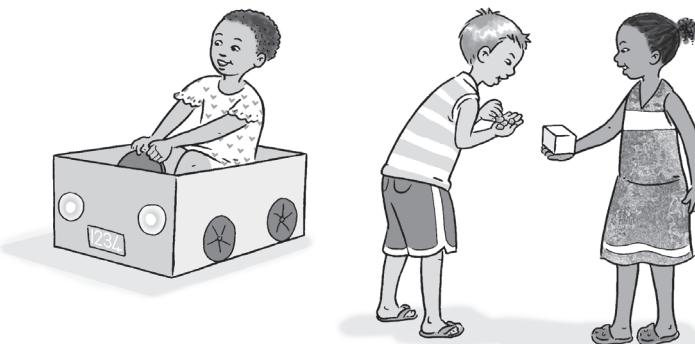

Learners need to know where materials belong. A shelf or table that is dedicated to maths equipment will help learners to be organised. Encourage learners to help each other during tidy-up time. Initially learners will need assistance and you will have to remind them where to put things, but they will soon get into the routine of putting things where they belong.

Choose group leaders and tidy-helpers each week. Give them specific tasks and responsibilities.

Free choice activities

Set out creative, interesting activities that learners can choose from once they have completed their workstation activity. These could include:

- blocks or other construction toys
- puzzles
- playdough
- books in the reading corner
- fantasy play, for example, shopping
- workbook or worksheet pages.

Assessment

Observation and continuous assessment during teacher-guided and whole class activities provides opportunities for insights into and a good overview of each learner's progress. This information is important for guiding further teaching and interventions for individual learners. The continuous assessment checklist on pages 184 and 186 of this guide is based on the content that has been taught in Term 4. This template can be used to record each learner's progress during the term.

Grade R Maths in the classroom

Set up an area in the classroom that is dedicated to maths and is near the mat. This is a shared space where learners can contribute to and engage with the topic they are learning about. An ideal maths area will include:

- small table against a wall
- number line made with string and pegs
- daily weather chart
- calendar for each month with blocks for each day
- chart with the names of the days of the week
- daily programme with pictures for the different activities
- learners' name cards and symbols arranged according to their group names
- helpers' symbols to move between learners' names according to each day of the week
- helpers' chart.

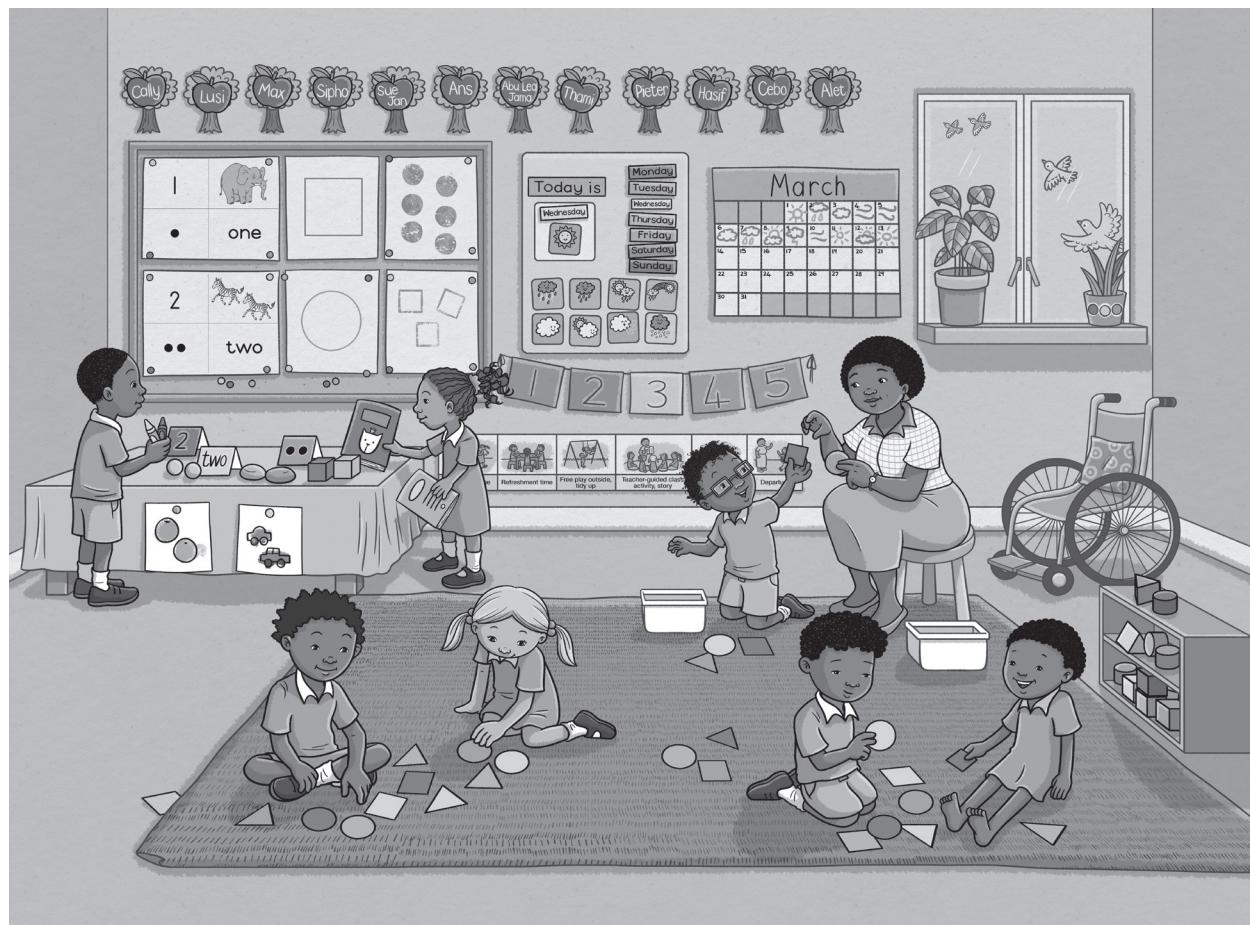

Ukuhlola

Okutjhejiweko nokuhlola okuragela phambili ngesikhathi semisebenzi ehlahlwa ngutitjhere neyetlasi yoke kunikela amathuba welwazi nehlathululo ehle yeragelophambili yomfundi ngamunye. Ilwazi leli liqakathekile ukuhlahla ukufundisa okuragela phambili nokungenelela emntwaneni ngamunye. Irhelo lokuhlola ukuhlola okuragela phambili elisekhasini 185 nele-187 womhlahlandlela lo linzinze kilokho okufundiswe kuThemu 4. Umfuziselo lo ungasetjenziselwa ukurekhoda iragelophambili lomfundi ngamunye ngesikhathi sethemu.

I-Grade R Maths ngetlasini

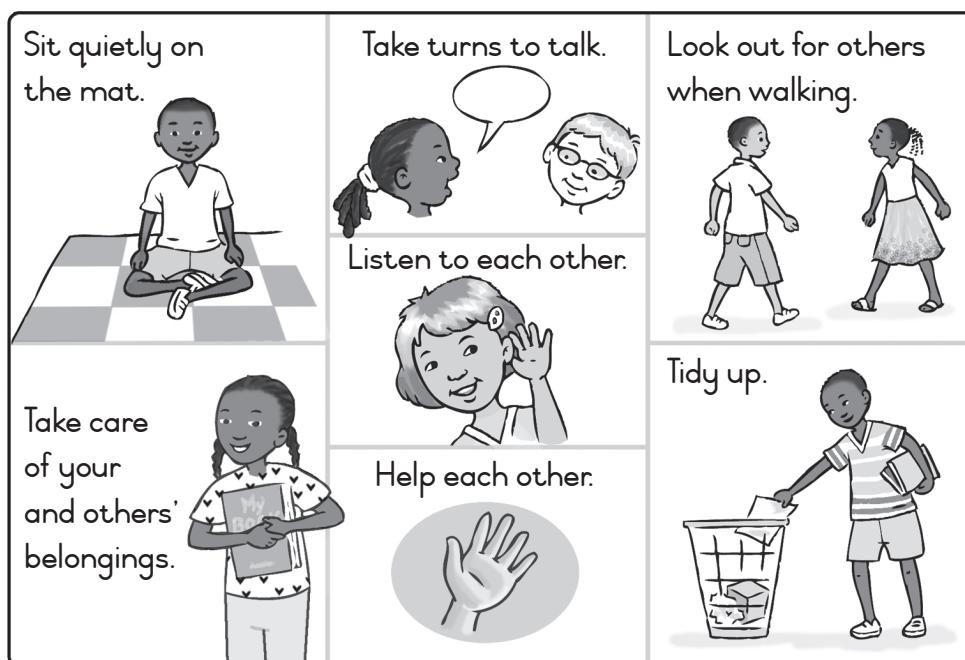

Lungisa indawo ngetlasini oyibekеле iimbalo begodu eseduze nomada. Le yindawo ekwabelwana ngayo lapha abafundi banganikela bebazibandakanye nesihloko ebafunda ngaso. Indawo yeembalo efanelekileko ifaka hlangana:

- itafula encani esame ngeboda
- inambalayini eyenziwe ngentambo namaphegsi
- itjhadi lobujamo bezulu bangamalanga
- ikhalenda yenya ngayinye enamabhlogo welanga ngalinye
- itjhadi elinamagama wamalanga weveke
- ihlelo langamalanga elineenthombe zemisebenzi ehlukileko
- amakarada namatshwayo wamagama wabafundi ahlelwе ngokuya kwamagama weenqhema zabo
- amatshwayo wabasizi azokukhamba phakathi kwabafundi ngokuya ngokwamalanga weveke
- itjhadi labasizi.

Make a ‘classroom rules’ poster with the learners. Display it where they can easily see it. There should be no more than six or seven rules.

Resources for Grade R Maths

Grade R Maths Resource Kit

Grade R Maths provides a kit for learning and teaching maths that provides apparatus for a small group of six to eight learners to use. The kit includes the following items:

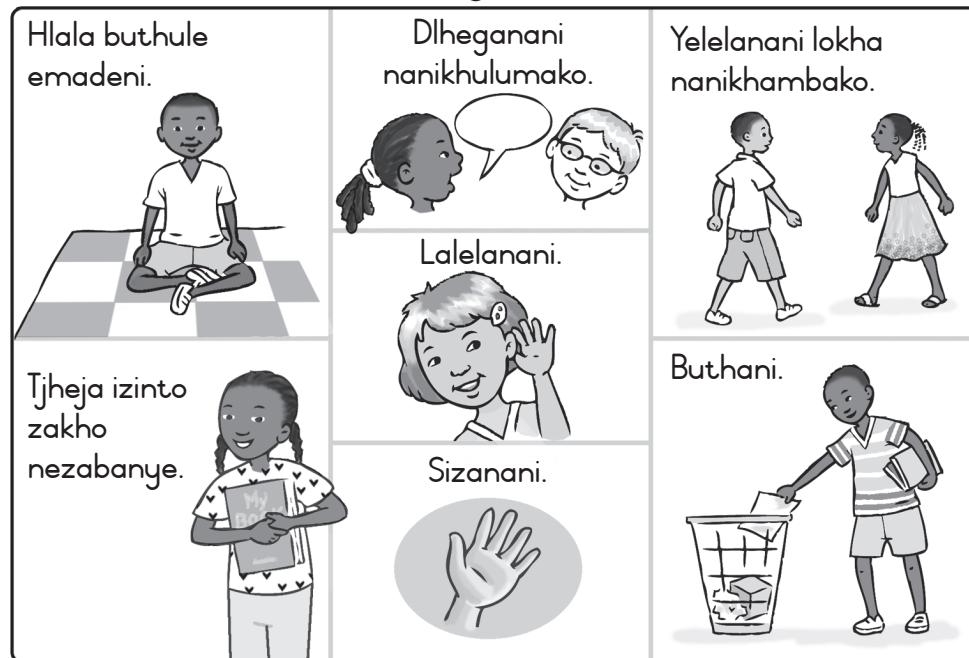

- counting materials, for example, coloured discs and sticks, fruit and animal counters, Unifix blocks
- jumbo dice
- strings of ten structure beads
- dot cards
- number cards: number symbols (0–10) and number words (zero–ten)
- attribute blocks.

These should not be the only resources that teachers and learners use during maths activities. Everyday objects from home are ideal for sorting, counting and exploring shapes.

Yenza iphosta etlolwe 'imithetho yetlasi' nabantwana. Ikhangise lapha bazayibona khona ngobulula. Imithetho ayingadluli kwemithandathunofana elikhomba.

Imithetho yetlasi lethu

IKhidi yeenSetjenziswa ze-Grade R Maths

I-Grade R Maths inikela ngekhidi yokufunda nokufundisa iimbalo enikela ngeensetjenziswa zeenqhema ezincani zabafundi abasithandathu ukuya kababunane kobana bazisebenzise. Ikhidi ifaka lokhu okulandelako:

- imatheriyali yokubala, isib. amadiski neengo jwana zemibala, iimbalisi zeenthelo neenlwana, namabhlogo we-Unifix
- idayisi elikhulu
- imitja yemincamo ehlelekileko elitjhumi
- amakarada wamaqatjhazi
- amakarada weenomboro: amatshwayo weenomboro (0–10) iinomboromagama (ziro ukuya etjhumi)
- amabhlogo wamatshwayo.

Lokhu akungabi ngizo zodwa iinsetjenziswa utitjhere nabantwana abangazisebenzisa ngesikhathi semisebenzi yeembalo. Izinto zangamalanga ezibuya emakhaya zifanelekile ekuhleleni ngamananeko, ukubala nekuhloleni amabumbeko.

Recycled materials

Store recycled materials in labelled containers with lids (such as: fruit and vegetable packaging, 2-litre ice-cream containers and 500-ml feta tubs). Place the containers on a shelf or somewhere that the learners can reach. Encourage learners to put the objects away during tidy-up time if they have used them at their workstations or during free choice activities. Here are some ideas for maths resources:

- bottle caps and lids (different shapes, sizes and colours)
- different-sized boxes (toothpaste, matchbox, cereal, medicine, packaging)
- plastic containers (500-ml and 1-litre bottles, margarine tubs, 250-ml and 500-ml yoghurt tubs, ice-cream containers, vegetable packaging)
- tubes and cylinders (cardboard toilet roll inners, paper towel inners, foil roll inners, tins)
- egg boxes
- buttons, old keys, plastic spoons, ice-cream sticks, bread packet tags
- variety of balls, beanbags, hula hoops.

Other resources

Other useful classroom resources for Grade R Maths teaching include:

- crayons, paint, glue, scissors
- playdough or modelling clay
- books that can be used for maths discussions
- building blocks and construction toys (collect wood offcuts if necessary)
- a variety of jigsaw puzzles and games, for example, dominoes, snakes and ladders, Ludo, Lotto

Imatheriyali eyenziwe kabutjha

Bulunga imatheriyali eyenziwe kabutjha ngeemphathini ezilebuliweko ezineemvalo (njengokuthi: izinto zokufaka iinthelo nemirorho, iimphathi ze-ayisikhrimu ezimalitha ama-2 neenkhaftinyana ze-feta ezi-500-ml). Beka iimphathi lezi etjhelfininofana kukuphi lapha abantwana bangazifikela khona. Khuthaza abafundi babuyisele izinto ngesikhathi sokubutha nangabe bazisebenzisile eentetjhini zabo zokusebenzelanofana ngesikhathi semisebenzi yokuzikhethela ngokutjhaphulukileko. Nasi eminye imibono mayelana neensemjenziswa zeembalo:

- iimvalo zamabhodlelo (amabumbeko, ubukhulu nemibala ehlukileko)
- amabhoksi wobukhulu obuhlukileko (isibha sokuhlamba amazinyo, amabhoksi weenthoro zomlilo, isiriyeli, umtjhoga, wokupaka)

The Grade R Maths Poster Book

There are eleven posters in the Grade R Maths *Poster Book*. The posters present familiar contexts that learners can relate to that capture some aspect of maths, for example, in the classroom, on the playground, and in the kitchen. The posters are intended to stimulate interest and discussion on maths topics, including: number, patterns, space and shape, sequencing of time and measurement. The posters can be used to engage learners in critical thinking and reasoning. They are perfect for developing problem-solving skills and for maths investigations.

Teachers can encourage learners to discuss the posters and share their thinking by asking questions to guide them in focusing on a particular aspect of the poster, for example:

- What do you see in the picture?
- Where do you think the children/people are?
- What is happening in the picture?
- Can you tell me a story about the picture?
- How many ... can you see? What if there was one more/fewer ...?
- Where is the ...?
- What would happen if ...?
- What do you think will happen next?
- What do you think ... can see from where they are standing?
- What pattern can you see? Describe the pattern.
- What shapes can you see?
- Which ... is the tallest/shortest?
- Can you use any maths words to describe something in the picture?

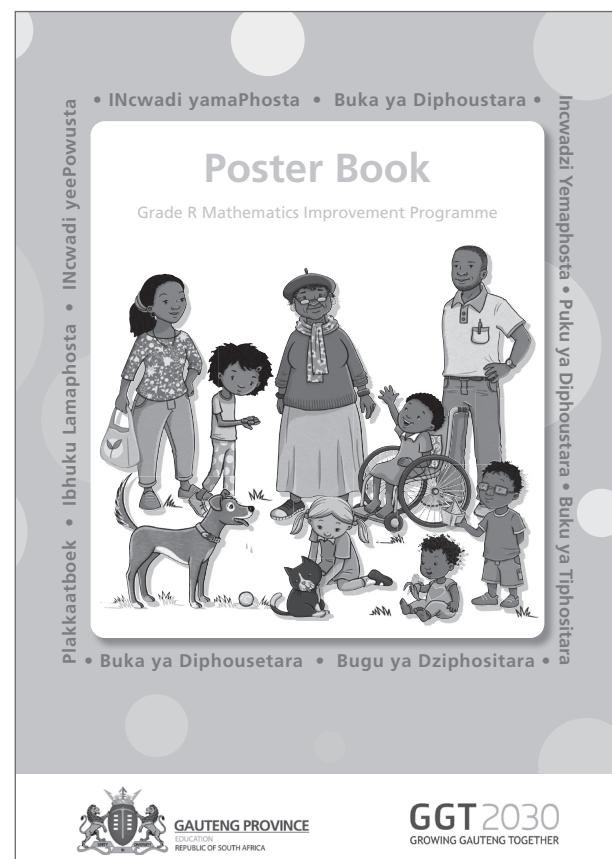

- itjhadi lokuphakama
- amakarada wokudlala amakhulu
- isingamali: iinhlavu namaphepha (yokusetjenziswa esitolo sokudlalisa)
- iwatjhi ekulu yebodenye analogo
- isikala sokudzimelela
- imincamo yokuhlela, ukuphothela nokwenza amaphetheni
- iisetjenziswa zemidlalo yehlabathi namanzi
- iisetjenziswa zokukhwelela, ukudzimelela, ukujinka, nokweqayeqa.

INcwadi yamaPhosta ye-Grade R Maths

INcwadi yamaPhosta ye-Grade R Maths inamaphosta alitjhumi nanye. Amaphosta la athula ubujamo obujayelekileko lobo abafundi abangazihlobanisa nabo ukubamba amanye amahlangothi weembalo, isibonelo, ngetlasini, etatawini lokudlalela, nangephunyaneni. Amaphosta la anqophe ukuhlahlambisa ikareko nemikhulumiswano yeenhloko zeembalo, okufaka hlangana: iinomboro, amaphetheni, isikhala nebumbeko, ukulandelanisa isikhathi nokumeda. Amaphosta la angasetjenziselwa ukubandakanya abafundi ngokucabangisisa okudephileko. Afaneleke khulu ukuthuthukisa amakghono wokurarulula imiraro nokuphenya ngeembalo.

Abotitjhere bangakhuthaza abafundi bakhulumisane ngamaphosta bese babelane ngemicabango yabo ngokubuza imibuzo yokubahlahla kobana baqalane nephuzu elithileko kuphosta, isibonelo:

Whole class activities

Day 1

What you need

- Number friezes 1–8
- Number frieze and house template for number 9 (page 204)
- *Number 9 story* (page 188)

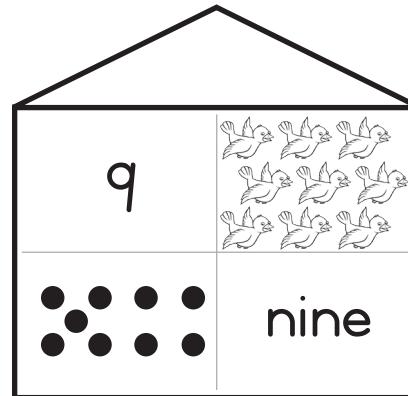

TIP
Remember to talk about the daily programme.
Remember to do the calendar, days of the week, months of the year and birthday chart each day.

1. **Song/rhyme:** Learners sing a song or say a rhyme of their choice from previous terms.
2. **Oral counting:** 1–20 and beyond, 10–1.
3. **Counting objects 1–10:** Learners put their hands behind their backs. Call out a number. Learners hold up the correct number of fingers to represent the number.
4. **Introducing number 9:** Point to number friezes 1–8.

Guiding questions:

- ★ How many animals do you think will live in the next house?
- ★ Will there be more or fewer than eight?

Tell the *Number 9 story*. Show the parts of the number frieze as you build up the story of the birds and images of the house: the different representations of number 9 – the picture, the dots, the symbol and the word. Display the parts of the frieze in the animal house next to the number 8 on the wall in the maths area. Count the birds together. Learners practise the number 9 by writing it in the air or on the mat with their fingers.

- ★ How many birds can you count?
 - ★ How many wings/beaks/legs does each bird have?
 - ★ How many more birds are there than mice/monkeys, and so on?
- Learners dramatise the story.
- ★ How did the birds fly?
 - ★ What did they do when they got to the house?
 - ★ Can you show how they slept that first night?

5. **Small group activities:** Describe the activities at each workstation. Workstation 4 is a board game using a dice. Show learners how to throw the dice and move their animal counters the corresponding number of spaces on the board.

Demonstrate how to play board games to make sure learners understand the rules of each game.

Show learners the bees left inside the box. Count together to check if they are correct. Repeat.

5. **Maths table:** Three groups of learners collect 10 similar objects outside. Each group says what the objects are and how many they found. Give each group a number 10 dot, symbol or word card. One group at a time puts their objects and the number 10 cards on the maths table.

Let learners estimate the number of objects there are in a group of objects before they count them, and then check their estimates. This helps them to develop a sense of the 'size' of the numbers they are counting.

- ★ How many counters are under your tub?
- Learners take two counters from under their tubs and place them on top of their tubs.
- ★ Now how many counters are under your tub? How many are on top? How many are there altogether?

Repeat using different combinations to 10.

Learners place all their counters on top of their tubs.

- ★ How many counters are under your tub? (None)

5. **Number track towers:** Place the number track and Unifix blocks on the mat. Learners take turns to say the number on each square of the track and to place a tower built from the correct number of Unifix blocks on the square.

Guiding questions:

- ★ How many Unifix blocks did you use for the tower on that number square?
- ★ Which group has more/fewer blocks?
- ★ How many blocks are on the zero?

6. **Practising number 0 using playdough:** Learners make the number symbol 0 out of playdough. Support learners who are ready to write 0.

Check that learners are able to:

- count groups of objects 1–10
- orally solve problems with numbers 0–10
- break down and build up numbers 0–10
- compare numbers in the range of 0–10
- recognise, match and name number symbols and number words for zero

TIP
Include examples of adding to and subtracting zero, for example: ‘Place zero counters on top of your tub.’

3. *Ukukhambelanisa isede enganalitho netshwayo lenomboro 0 nenomborogama:*

Beka iimbalisi 1–10 ngakamanye amakopi webhoksi lamaqanda, ulise amakopi ambalwa anganalitho. Abafundi babeka itshwayo lenomboro 0 nenomborogama eduze namakopi anganalitho.

Imibuzo ehlahlako:

- ★ Ngiliphi ikopi ocabanga bonyana lineembalisi ezinengi ngaphezulu/ezincani khulu? Kubayini ucabanga lokho?
- ★ Ngiwaphi amakopi anganalitho? Zingaki iimbalisi ezingemakopini lawo?
- ★ Mangaki amakopi anganalitho nasele ahangene woke?

4. *Ukungezelela nokukhupha:* Abafundi babeka iimbalisi zabo phezu komada bese baqalisa iinkhaftini zabo phasi. Babeka iimbalisi ezihlau ngaphasi kwsikhafthini.

Imibuzo ehlahlako:

- ★ Zingaki iimbalisi ezingaphasi kwsikhafthini sakho?
- Abafundi bathatha iimbalisi ezimbili ngaphasi kweenkhafthini zabo bazibeka ngaphezu kweenkhafthini zabo.
- ★ Kwanjesi zingaki iimbalisi ezingaphasi kwsikhafthini sakho? Zingaki ezingaphezulu? Zingaki nazihlangene zoke?
- Buyelela ngokusebenzisa ihlanganisela ehlukileko ukufika ku-10.

- ★ Mangaki amabhlogo aphezu kwakaziro?

6. *Ukujayeza inomboro 0 ngokusebenzisa ihlama yokudlalisa:*

Abafundi benza itshwayo lenomboro 0 ngehlama yokudlalisa. Sekela abafundi esele balungele ukutlola u-0.

Tjheja bonyana abafundi bayakwazi uku:

- bala iinqhema zezinto 1–10
- rarulula imiraro eneenomboro 0–10 ngomlomo
- hlukanisa nokwakha iinomboro 0–10
- madanisa iinomboro ngerhemo lika-0–10
- khumbula, khambelanisa nokutjho itshwayo lenomboro nenomborogama kaziro

Workstation 1

What you need

- Playdough
- Playdough template: Number 0 (page 214) – 1 per learner

Learners use playdough to complete the template. They create baskets, boxes, nests, and so on, with nothing inside.

Workstation 2

What you need

- 1 ice tray
- 200 coloured counters (Resource Kit)
- Dice with the 6-dot side covered with a sticker and replaced with '0'

The first learner rolls the dice and places that number of counters in one of the ice-tray compartments. The next learner does the same, placing that number of counters in the next compartment. Repeat.

Workstation 3

What you need

- A tub with 10 fruit counters – 1 per learner
- Dice

Learners place their counters in a row. They take turns to roll the dice and subtract from their row the same number of counters as shown on the dice and place them in their tubs. The first learner to place all their counters in their tub wins.

Workstation 4

What you need

- 6 tennis balls
- Ramp (for example, a wide plank)
- 4 tubs covered in different coloured paper

Place the ramp at a raised angle of about 20 cm from the floor. Place the tubs on the floor at the high end of the ramp. Learners take turns to roll their balls up the ramp and try to land their balls in the tubs. They count the total number of balls that landed in the tubs.

- Small table/box
- 3 pattern cards:
– Green and red
- Green, red and yellow
- Green, red, yellow and blue
- 1 red, green, blue and yellow counting stick per learner

1. **Rhyme:** Say the rhyme, *It's pattern time*, with actions.
2. **Oral counting:** 0–20 and beyond, 10–0.
3. **Counting objects 1–10:** Place 10 green, 5 red, 2 blue and 10 yellow counting sticks in separate piles on a small table or box so that all the learners can see them.

Guiding questions:

- ★ How many green/red/blue/yellow sticks do you think there are?
- ★ Which colours are there 0 sticks of?
Choose a learner to count and hold each pile as the class counts together.
- ★ How many sticks are left on the table/box?

4. **Extending patterns:**

Learners sit in a circle. Place 30 green and 30 red sticks in the middle of the mat. Each learner takes one green stick and one red stick. Show a pattern card with the two colours. One learner starts by placing the correct colour stick on the mat. Learners take turns to continue the pattern until everyone has had a turn – the pattern will continue around the circle of learners.

Guiding questions:

- ★ Who can tell me what the pattern is?
- ★ What colour stick will come next in this pattern?
- ★ What colour should we add next to extend the pattern?

Give each learner a yellow stick. Show a pattern card with three colours and repeat the activity.

- ★ Can you make a pattern with three colours?

Give each learner a blue stick and repeat with four colours.

5. **Small group activities:** Describe the activities at each workstation.

TIP
If learners have mastered these pattern skills, extend the activity using two attributes, such as colour and shape or size.

Workstation 2

What you need

- Large containers – 1 per learner
- A variety of smaller containers, for example, yoghurt cups, spoons, plastic tubs
- Paper and crayons
- Sand

Learners choose a container and count the number of times they fill it with sand to fill the large container. They draw a picture of their container and write the number symbol to represent the number of non-standard measuring units used. Repeat with different containers.

Workstation 3

What you need

- 8 sets of 6 picture cards of cups with different levels of sand

TIP
Numbers 6–10 will be done in Week 8.

Workstation 1

What you need

- Number book – 1 per learner
- Crayons

Learners write the number symbol 1 and draw one object on the first page, 2 on the second page, and so on, up to 5.

Workstation 2

What you need

- Number symbols 0–10, 1 set per learner (*Resource Kit*)
- A3 strip of paper/cardboard – 1 per learner
- Crayons/pencils

Learners arrange the number symbol cards in order from 0–10 above the strip of paper. Remind them to spread out the number symbols across the top of the paper strip so that there is enough space for them to write the numbers. They write the numbers on the strip of paper below each symbol.

Workstation 3

What you need

- An A4 sheet of paper with a tree with numbers 1–10 drawn on it – 1 per learner
- 2 dice per pair of learners (on one dice cover the '5' and '6' with a sticker/paper)

In pairs, learners take turns to throw the two dice. They count the number of dots on the dice. They find the corresponding number on the tree, circle it and then colour it in. Once all the numbers on the tree have been coloured in, learners create a pattern of their choice by writing number symbols around the edge of the page.

Workstation 4

What you need

- Block structures in the block area – 1 per learner
- Blocks

Build block structures in the block area or on the mat. Learners copy one structure each and swap until they have copied each structure. They take turns to create structures for each other to copy.

Count the objects together.

- ★ Were there too few/too many/more than 10, and so on?

- Comparing numbers:** Play the game, 'Build and compare'. Learners sit facing a partner. Give each pair of learners a container of Unifix blocks and two number cards. They each take out a card without looking at the number. As they turn over their number cards, together they say, 'One, two, three compare.'

Each learner says his/her number to his/her partner, 'I have a _____. They each use Unifix blocks to build a tower to represent their number. They compare their towers and their numbers using the following vocabulary: *more, less, fewer, same* (for example, 'six is more than four').

Learners swap containers with another pair of learners and repeat the activity.

**Guiding questions:**

- ★ Who has a number that is more (bigger, higher)/less (smaller, lower) than their partner's number?
- ★ How many blocks are there in your tower?
- ★ Who has fewer/more blocks in their tower than their partner?
- ★ Who has zero blocks in their tower?

1. **Ukurarulula imiraro yamagama ngokusebenzisa iimbalisi:**

Abafundi babala iimbalisi zabo zeenlwana. Buza imiraro yamagama emayelana neenlwana.

Imibuzo ehlahlako:

- ★ USandile uneenlwana ezi-10. Uletha iinlwana ezintathu ngesiphephelweni ebusuku. Zingaki iinkomo ezingaphezulu afanele ukuziletha kobana zoke iinkomo zibe ngaphakathi?

2. **Ukwabelana okunesalela:** Abafundi bahlala ngepara baqalene. Barhemisa iinlwana zabo ezi-10 ziqaqlana.

Imibuzo ehlahlako:

- ★ USandile ufunia iinlwana zingene ngesiphephelweni sakhe ngambili. Khombisa bonyana angazibuthelela njani.
- ★ Bese ngantathu?

 **TIP**

Draw learners' attention to the fact that some things, such as the apple, can be cut to share, but other things, such as the animals, can't be cut to share.

- ★ What do you notice? What can we do about the animal that is left out?

Take time to listen to the learners' suggestions about how they might manage the problem of the remaining animal.

Learners place eight animals in their tubs and take out the cut-outs of three apples.

- ★ How can you share these three apples equally between your two animals?

Learners try to solve the problem. When they realise that there is one apple remaining, discuss how to cut the apple in half to share it equally.

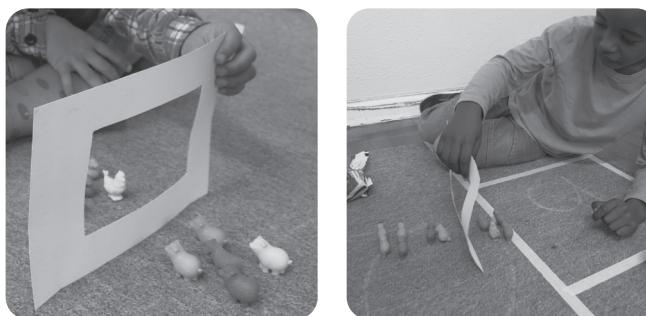

3. **Combinations of 10 using animal counters:** Learners arrange their animals in a vertical line. Using their 'fences', they explore how many different ways they can separate the animals into two groups.

Guiding questions:

- ★ Can you place the 'fence' so that there are four animals on one side of the fence?

Learners 'fence off' four animals and count these.

Learners peep through their fences.

- ★ How many animals are on the other side of the fence?
- ★ How many animals are there altogether?

Learners count the animals on the other side of the fence and then repeat the activity with other combinations that make up 10.

- ★ Can you place the fence so that there are exactly the same number of animals on each side?

4. **Combinations of 10 using structure beads:** Ask learners to show five beads. Encourage them to do this without counting in ones. Learners hold five beads and start their count from 5.

Count on from 5 to 8.

Abafundi 'basusa isibiyelo' eenlwaneni ezine bese bayabala.

Abafundi bahlola ngeembiyelo zabo.

* Zingaki iinlwana ezingehlangothini elingale kwesibiyelo?

* Zingaki iinlwana nasele zihlangene zoke?

Abafundi babala iinlwana ezingehlangothini elingale kwesibiyelo bese babuyeleta umsebenzi ngezinye iinhlanganisela ezenza i-10.

* Ungasibeka isibiyelo kobana kube nenani leenlwana elifana poro amahlangothi womabili?

4. Ihlanganisela ye-10 ngokusebenzisa imincamo ehlelekileko:

Balani ukusuka ku-5 ukuya ku-8.

Guiding questions:

- ★ How many more beads did you count?
Hold four/six/three beads. Count on from 4 to 7/10/8, and so on.
- ★ How many beads do you have now?

Check that learners are able to:

- solve problems with numbers 0–10
- count on from a given number – up to 10
- share counters equally with a remainder
- identify groups that combine to make 10

Workstation 1

What you need

- A4 paper – 1 piece per learner
- Paint in shallow containers
- Sponges/cotton wool/ear buds
- Crayons

Learners fold their pages in half. They write a number between 1 and 5 at the top of one side of the page. They dip sponges/cotton wool/ear buds/their finger into the paint and make the same number of dots as the number they wrote. They fold the page and press it down to make the same number on the opposite side of the page. They count how many dots they have now and then write that number.

Workstation 2

What you need

- Playdough and mats
- Number track 0–10 – 1 per learner

Learners mould ‘bricks/blocks’ from playdough and build towers to match the numbers on the number track 0–10.

Workstation 3

What you need

- Number symbols 0–10 (*Resource Kit*) – 8 per pair of learners
- Unifix blocks

Learners work in pairs to play, 'Build and compare'. Each learner has four number symbols in a pile. As they each turn over a number symbol, together they say, 'One, two, three compare.' Each learner says his/her number to his/her partner, 'I have a _____. They each use Unifix blocks to build a tower to represent their number. They compare their towers and their numbers using the following vocabulary: *more, less, fewer, same* (for example, 'six is more than four').

They repeat this another three times with different number symbols. They swap their sets of number symbols with other learners and play the game again.

Workstation 4

TIP

Learners can create their own 'number' picture when they have finished.

What you need

- Number books from Week 7
- Kokis/crayons
- A4 paper
- Stapler

Learners complete the pages for 6–10 in their number books. They make envelopes for their books (by folding and stapling A4 pages). They write their names and the number of their home on the front of the envelope.

Week 1

Story: Number 9 story (with Number 9 frieze template)

Next came nine Birds. They flew in the air for many days looking for just the right kind of home that is safe and warm. They flapped their wings all day long, looking high and looking low for a place they can call home.

At last they find a house that looks nice and cosy. The nine Birds perch on the windowsill and peer inside. There is nobody living in the house!

The Birds use their beaks to gather materials to make the number symbol 9 and the number word nine, which they stick on the front of the door. Each Bird makes one doorbell for the front door.

There is only one bedroom in the house, but luckily birds don't need beds. They like to sleep while sitting up!

Three Birds find a windowsill, three Birds perch on a chair and three Birds sit on the bath. They all fluff out their feathers to make nice warm blankets. They are so tired that there is not even a twitter or a tweet – the nine Birds sleep all through the night and are not up early enough the next day to catch worms for breakfast.

Luckily the nine doorbells ring just as the Birds are feeling hungry. Their friendly neighbours are standing at the front door with nice big, fat, juicy worms to welcome the Birds: one Elephant from house number 1, two Zebras from house number 2, three Meerkats from house number 3, four Giraffes from house number 4, five Monkeys from house number 5, six Ducks from house number 6, seven Frogs from house number 7 and eight Mice from house number 8.

Rhyme: Two little chickens

Two little chickens looking for some more
Along came another two and they make four
Run to the haystack, run to the pen
Run little chickens, back to mother hen.

Four little chickens getting in a fix
Along came another two and they make six
Run to the haystack, run to the pen
Run little chickens, back to mother hen.

Six little chickens perching on a gate
Along came another two and they make eight
Run to the haystack, run to the pen
Run little chickens, back to mother hen.

Eight little chickens run to mother hen
Along came another two and they make ten
Run to the haystack, run to the pen
Run little chickens, back to mother hen.

Song: The ants go marching two by two

The ants go marching two by two.
Hoorah! Hoorah!
The ants go marching two by two.
Hoorah! Hoorah!
The ants go marching two by two;
The little one stops to tie his shoe,
And they all go marching down
To get out of the rain.
Boom, boom, boom, boom!

Week 2

Story: Number 10 story (with Number 10 frieze template)

Ten Bees have been buzzing around all day drinking the juice – called nectar – from the beautiful flowers around the neighbourhood. Whenever one Bee finds a flower with juicy nectar, it does a little dance to tell the other Bees that there is food nearby.

The Bees need to find a home soon so that they can make honey from the nectar they have collected. They look at the last house in the row and decide it will make a perfect beehive – this is what bees call their homes.

Bees are very hard workers and they do their jobs well, so they set to work buzzing about to fix their beehive and make it cosy. They make their front door out of twigs from trees. The number symbol 10 and the number word ten goes on the front of the door with 10 doorbells. The Bees make curtains for their windows out of green leaves, they make candles from beeswax and they make honey for the dark nights. The queen Bee rests in the hive while the other nine worker Bees turn the nectar they have collected into honey and pour it into nine honeypots. Early the next morning all ten Bees put on their stripy yellow and black jerseys and their black boots and deliver one honeypot to each of their new neighbours: the one Elephant from house number 1, two Zebras from house number 2, three Meerkats from house number 3, four Giraffes from house number 4, five Monkeys from house number 5, six Ducks from house number 6, seven Frogs from house number 7, eight Mice from house number 8 and nine Birds from house number 9.

Song: Ten little honey bees

Ten little honey bees buzzing around
One went to the hive
One to a flower
How many honey bees buzzing around?
Eight little honey bees are left now.
Eight little honey bees buzzing around
One went to the hive
One to a flower
How many honey bees buzzing around?
Six little honey bees are left now.
Six little honey bees buzzing around
One went to the hive
One to a flower
How many honey bees buzzing around?
Four little honey bees are left now.
Four little honey bees buzzing around
One went to the hive
One to a flower
How many honey bees buzzing around?
Two little honey bees are left now.
Two little honey bees buzzing around
One went to the hive
One to a flower
How many honey bees buzzing around?
No more honey bees are left now.

Story: The beehives

Every day the ten Bees left their beehive and went buzzing around looking for flowers. One day they flew a little further into the forest where the trees were tall. They could hear the buzzing sounds of other bees and as they flew closer they could see many beehives hanging from the trees. They saw lots and lots of bees going in and out of each beehive. There were too many bees to count.

Let's pretend the counters are the bees and your lids are the beehives.

Week 3

Song: Ten green bottles

Ten green bottles hanging on the wall
Ten green bottles hanging on the wall
And if one green bottle should accidentally fall
There'll be nine green bottles hanging on the wall.

(Repeat for nine, eight, seven, six, five, four, three, two)

One green bottle hanging on the wall
One green bottle hanging on the wall
And if one green bottle should accidentally fall
There'll be no green bottles hanging there at all.

Story: Number 0 story (with Number 0 frieze template)

All the animals now lived happily side by side in their own houses. They went out of their way to be friendly and helpful to one another.

One day as Elephant looked out of his window he saw a machine digging a hole in the ground next door to him. Over the next days and weeks all the animals watched as a new house was built right before their very own eyes. Cement was mixed, bricks were laid, a roof was built and the doors and windows were fitted. Finally the house was ready. It was a beautiful house, strong and well built.

'Who will live in this splendid new house?' the animals wondered. They all gathered outside the door of the house, excited to meet their new neighbours. There was no doorbell on the door, but the four Giraffes saw that the door was open and they curled their long necks through the door. 'Anyone home?' they called. No one was home.

The animals all crowded inside. The house was empty. The Birds flew from room to room, but there was no furniture – no bed, no table and no chairs. There was nothing ... zero.

To this day, nobody has moved into the new house. It has stayed empty with nothing inside it. The animals call it the zero house because this is the word that means 'nothing'.

Story: The Elephant's bath

Part 1

One day Elephant left his house to go down to the river. ‘Hey, Elephant,’ said his neighbours, the Monkeys, ‘where are you going?’

Elephant replied, ‘I am going for a walk to look for a place to take a bath.’

‘Hmmm,’ said the Monkeys. ‘That’s a long way to go. We have a bathtub. Why don’t you have a bath at our house?’

Part 2

Elephant explained that he would make his way down to the river to take his bath. He stopped in front of the Giraffes’ house. ‘Hey, Elephant,’ said the Giraffes, ‘why are you carrying a bucket?’

Elephant replied, ‘I carry a bucket with me so that when I go to the river I can fill it up and have nice refreshing water to drink.’

As he got closer to the river, a little boy ran past Elephant and down to the river where he filled up a jug and some cups with water.

As the little boy raced past, he told Elephant that there was a fire at the campsite.

Elephant stuck his trunk into the river, filled his bucket with water from the river and followed the little boy to the fire. Elephant and the little boy emptied the water onto the fire to put it out.

Part 3

It was hot now and Elephant was keen to wallow in the cool water. As he romped and splashed around in the water and trumpeted with excitement he thought about how he could make his own swimming pool to put in his back yard. He had seen some blow-up swimming pools in the shop. He would need to find a very large swimming pool and would need to think about how to fill it.

Song: There’s a hole in my bucket

There’s a hole in my bucket, dear Sindi, dear Sindi
There’s a hole in my bucket, dear Sindi, a hole.
Then mend it, dear Vuyo, dear Vuyo, dear Vuyo
Then mend it, dear Vuyo, dear Vuyo, mend it.

With what shall I mend it, dear Sindi, dear Sindi?
With what shall I mend it, dear Sindi, with what?
With straw, dear Vuyo, dear Vuyo, dear Vuyo
With straw, dear Vuyo, dear Vuyo, with straw.

The straw is too long ...

Then cut it ...

With what shall I cut it? ...

With a knife ...

The knife is too blunt ...

Then sharpen it ...

With what shall I sharpen it? ...

With a stone ...

The stone is too dry ...

Then wet it ...

With what shall I wet it? ...

With some water ...

With what shall I fetch it? ...

With a bucket ...

BUT THERE’S A HOLE IN MY BUCKET!

Story: *Animals' race*

One day the animals woke up to find dew drops on their window panes. The sky was cloudy and the weather was cool. Elephant blew his trumpet to call the animals together. They knew they should meet in the big field behind their houses when they heard his call. He suggested that they should have a race around the field, down to the river and back. He asked the Ducks to fly up and sit in the trees to check that the runners kept to the track and the Birds and Bees to fly above the runners to see that they were safe during the race.

There wasn't a lot of space on the track so there could only be six runners in the race. There was a lot of excitement as they chose which one of the Zebras, Meerkats, Giraffes, Monkeys, Frogs and Mice would run in the race.

Eventually when the runners had been chosen, the six animals lined up. Then Elephant blew his trumpet and they took off.

It has four sides,
They are the same.

A triangle has three sides,
A triangle has three sides,
Up the mountain,
Down, and back.
A triangle has three sides!
A rectangle has four sides,
A rectangle has four sides,
Two are long, and
Two are short.
A rectangle has four sides!

And you turn yourself around.

You put your rectangle in ...
You put your square in ...
You put your triangle in ...
