Overview

Purpose

This is the eighth of twelve Grade R Mathematics Improvement Programme workshops, which form part of the Gauteng Department of Education (GDE) Grade R Mathematics and Language Improvement Project.

The purpose of this workshop is to continue assisting teachers to implement the Maths Programme in their classrooms. Participants will have the opportunity to reflect on their observations. They will explore how the guiding principles of teaching maths in Grade R should inform their planning, teaching and assessment. They will also consider learner progress, and individual developmental and learning needs. The workshop explores the content for Term 3 Weeks 4–6 and its classroom implementation.

References to the Grade R Mathematics Content Areas are taken from the *Curriculum and Assessment Policy Statement (CAPS): Grade R Mathematics (Final Draft)*, 2011, Department of Basic Education, South Africa.

Video 1

Activity Guide: Term 3, Week 3, Teacher-guided activity (pages 64–67)

Watch the video of a teacher working with a small group of learners during the teacher-guided activity in Term 3 Week 3.

Observe how the teacher:

- ◆ has prepared the small group activity
 - ◆ manages the transitions between the eight tasks
 - ◆ uses questions to guide the learners
 - ◆ records her observations of what has been learnt using the '**Check that learners are able to**' observation list.
-
-
-
-

Facilitator's notes

Show the video and lead a discussion based on the four observation prompts. If participants do not mention the following points, add them to the discussion.

- ◆ It is essential to read the *Getting ready* and *What you need* sections of the *Activity Guide*.
- ◆ It is important to be prepared **before** the week/day begins and to have all the resources available during an activity.
- ◆ Teachers must have read the activities and be able to engage with the learners without reading the *Activity Guide* line by line.
- ◆ Manage the time allocated to an activity. Do not spend too long on any task so that others have to be omitted. (Remember learners in Grade R should only spend 10–15 minutes on an activity.)
- ◆ Use closed questions to determine knowledge/facts and use open-ended questions to probe learner's reasoning and to find out how they solve problems.
- ◆ Listening to and observing **each** learner provides insight into their progress. It helps you to identify their abilities and the gaps in their skill and/or understanding.

3. Yabelana ngemasubuciko ekwenta kancono kufundzisa nekufundza kwetinsayeya lohlangabetene nato.

Session 1: Measurement

1 hour

Facilitator's notes

- ♦ Remind participants that the learners in Grade R measure informally, to find out 'How much of something' there is, by direct comparison and by using non-standard units of measurement. The focus in Grade R is on comparing how many non-standard units something measured. Discuss how learners can develop their estimation skills during measurement activities.

In Terms 1 and 2, time and length were the focus of Measurement. This session will revisit these topics and expand the discussion of Measurement to include mass, and capacity and volume.

Measurement is about finding out 'how much' there is of something. In Grade R, the focus of measurement is on:

- ♦ time
- ♦ length
- ♦ mass
- ♦ capacity and volume.

In the next activity, you will explore each of these measurement concepts.

Learners in Grade R measure informally, by direct comparison and by using non-standard units of measurement. Learners develop their estimation skills during informal measurement activities. They estimate how long or how heavy they think something is and then use a non-standard measuring instrument to find out how accurate their estimation was.

Facilitator's notes

- ♦ For **Activity 2**, set out the materials at different measurement workstations and clearly label each workstation according to the concept:
 - **Length:** string, pencils, sticks
 - **Capacity and volume:** jug, vase, cups, bottles and containers of different sizes (including two containers with different shapes, but the same capacity), bucket of water
 - **Mass:** balance scale, two or more kinds of fruit, books of different masses, one plastic bottle and one glass bottle of different masses
 - **Time:** candles, egg timers, stopwatch (on a cellphone).
- ♦ Divide participants into four groups and assign each group to a different measurement workstation. Explain that the groups will rotate. Participants should answer the questions in their *Participant's Workbook* for each workstation. They will spend about ten minutes at each workstation.

IseShini 1: Kulinganisa

1 li-aWa

Emanotsi emfundzisi

- ◆ Khumbuta bahlanganyeli kutsi bafundzi beLibanga R basebentise emayunithi ekulinganisa langekho ezingeni, kutfola kutsi 'Intfo letsite ingakanani', ngekucatsanisa-ngco ngekusebentisa emayunithi ekulinganisa langekho ezingeni. Kugila kuLibanga R kusekucatsaniseni kutsi intfo ikalwe yaba ngemayunithi ekulinganisa langekho ezingeni. Coca ngekutsi bafundzi bangawatfutfukisa kanjani emakhono abo ekulinganisa ngesikhatsi semisebenti.

Kuthemu 1 ne-2, sikhatsi nebudze bekugcile kukweKulinganisa. Leseshini lena itawubuketa letihloko leti bese yenabisa lengcogco yeKulinganisa kute kutsi ifake ekhatsi sisindvo, umtsamo kanye nevolumu.

Kulinganisa kumayelana nekutfola kutsi 'kungakanani' kwalokutsite. KuLibanga R, kugila kukwekulinganisa ku:

- ◆ sikhatsi
- ◆ budze
- ◆ sisindvo
- ◆ umtsamo nevolumu.

Kulomsebenti lolandzelako, utawujula kumcondvo wekulinganisa ngamunye.

Bafundzi kuLibanga R balinganisa ngalokungekho ezingeni, ngekucatsanisa-ngco kanye nekusebentisa emayunithi ekulinganisa langekho ezingeni. Bafundzi batfutfukisa emakhono abo kulinganisela ngesikhatsi semisebenti yekulinganisa lokungakahleleki. Lokulinganisela kutsi bacabanga kutsi intfo yindze kangakanani noma isindza kangakanani bese basebentisa intfo yekulinganisa lengekho ezingeni kutfola kutsi kulinganisela kwabo kunemba kangakanani.

Emanotsi emfundzisi

- ◆ **KuMsebenti 2**, beka imethiriyeli etindzaweni tekusebentela tekulinganisa letehlukene bese ubhala ngalokucacile indzawo yekusebentela ngayinye kuye ngekwemcondvo:
 - **Budze**: intsambo, emapeniseli, tindvuku/tintsi
 - **Umtsamo nevolumu**: lijeke, ivasi, tinkomishi, emabhodlela netimumatsi letinemasyizi lehlukene (kufaka ekhatsi timumatsi letibobunjwa labehlukene, kepha letinemitsamo lefananako), libhakede lemanti
 - **Sisindvo**: sikali, tinhlobo tetitselo letimbili noma ngetulu, emabhuku lanetisindvo letehlukene, libhodlela leplastiki linye nelibhodlela lengilazi linye lanetisindvo letehlukene
 - **Sikhatsi**: emakhandlela, tigadzatikhatsi temacandza, liwashi lekucipha sikhatsi (kumakhalekhukhwini).
- ◆ Yehlukanisa bahlanganyeli babe ngamacembu lamane bese ucondzisa licembu linye endzaweni yekusebentela. Chaza kutsi lamacembu atawujikeleta. Bahlanganyeli bafanele kutsi baphendvule imibuto leku *Tincwadzi Yekusebentela Yemhlanganyeli*
- ◆ tendzawo yekusebentela ngayinye. Batawucitsa cishe emaminitsi lalishumi endzaweni yesekusebentela ngayinye.

- ◆ After the activity, discuss each workstation. Discuss how accurate the estimations were and which of the estimations could not be checked by measuring with the tools provided, e.g., the tallest person, whether it would take longer to eat lunch or drive to school.
- ◆ Highlight how learners need many opportunities to develop their comparison and estimation skills before they can use standard units of measurement.

Activity 2

With your group, move to the measurement workstation you have been assigned to and answer the questions in your *Participant's Workbook*. Rotate to the next workstation when you receive the signal.

Length

Refer to page 211 of the *Concept Guide*. What vocabulary did you use during this activity?

Find the answer to each of the following and identify the non-standard unit of measurement you used.

	Estimate (guess)	Non-standard unit of measurement	Length
1. Who has the longest shoe?			
2. Who is the shortest?			
3. How long is your <i>Participant's Workbook</i> ?			
4. Who has the longest arm?			
5. How wide is your table?			
6. How many hand spans is the height of the door?			

- ◆ Ngemuva kwalomsebenti, cocani ngendzawo yekusebentela ngayinye. Cocani ngekutsi lokulinganisela bekunemba kangakanani nekutsi ngukuphi kulinganisela lebekungeke kuhlolwe ngekulinganisa ngemathulusi lebawaniketiwe, sib. umuntfu lomudze kakhulu, kutsi mhlawumbe kutawutsatsa sikhatsi lesidze kudla kwasemini noma kushayela uye esikolweni.

Session 2: Measurement (continued)

1 hour

Activity 3

Consider the measurement activities that you have just experienced in Activity 2. How is your classroom set up to provide similar learning experiences?

In Grade R, Measurement focuses on estimating, weighing, comparing and ordering objects according to how heavy or light they are.

Learners may find it difficult to understand that a small object can be heavier than a larger object. They need many opportunities to explore small heavy objects, small light objects, big heavy objects and big light objects.

Facilitator's notes

- ◆ Show Video 2. After the video, discuss what participants observed.
- ◆ Point out that mass is an abstract concept. Learners cannot see whether something is heavy or light. Teachers in Grade R often introduce the concept of mass with a balance scale so that learners can see what happens when an object is placed on each of its sides.
- ◆ Tfola kutsi bahlanganyeli basisebentisile yini sikali sekulinganisa.
- ◆ Often learners notice that one side of the balance scale goes up and one side goes down, but they think that this is because the side of the scale that is higher is heavier. Teachers can help by pointing out that the side with the heavier object always goes down.

Video 2

Watch the video of comparing the mass of one object against another.

Discuss these questions.

- ◆ What do you see happening?
- ◆ What concepts are being taught and learnt?
- ◆ What skills are being practised?
- ◆ What are the learners doing and saying?
- ◆ How is the teacher mediating learning?

- ◆ As the groups are working, join their discussions and provide input on the content where they need this for their presentations.
- ◆ To support the participants' discussions, refer them to the relevant sections on pages 138–219 of the *Concept Guide*.

As you know, the Maths Programme is designed to introduce new knowledge and build on this progressively across the weeks and terms. During this session, we will revisit Content Areas and topics that we have dealt with in previous workshops and we will discuss how these topics have been presented in the Maths Programme.

Activity 4

The facilitator will give a topic to each group to discuss.

You are required to prepare a presentation on your understanding of the topic and how the Maths Programme deals with the development of the concepts and skills related to it. Read the relevant information associated with your topic in the *Concept Guide* (pages 138–219).

You will receive ONE of the following topics:

1. How are shapes introduced and consolidated in the Maths Programme? Refer to Term 3, Week 4, Days 1, 2 and 3 to support your discussion.
2. Position and direction are difficult concepts for young children to grasp. How does the Maths Programme present these topics in Terms 1, 2 and 3? Refer to Term 3, Week 4, Days 4 and 5 to support your discussion.
3. Term 3, Week 4, Day 5 deals with the topic of symmetry. Explain your understanding of this topic. Share your experiences of teaching symmetry and how your learners have demonstrated their understanding of it.
4. Dot cards are used throughout the Maths Programme. Discuss the value of using this resource and if/how it contributes to building number concept. Refer to Term 3, Weeks 4 and 6 to support your discussion.
5. Discuss the routine that is used to introduce a new number in the Maths Programme. Explain how this routine builds on and consolidates the development of number concept. Refer to Term 3, Week 6 to support your discussion.

It is important to plan and prepare thoroughly for each week. This will allow you to feel confident about what you are doing and help you to focus on teaching and working with the learners. As you have already experienced in Terms 1 and 2, the Maths Programme is carefully structured, and the maths content is presented in a progressive developmental sequence. It has been designed to ensure that all the Grade R Mathematics content and skills are covered and learners are well prepared for Grade 1. Teachers need to be cautious about selecting activities from different weeks and leaving other activities out.

Facilitator's notes
